注 意 事 項

- 1 解答用紙に、正しく記入・マークされていない場合は、採点できないことがあります。
- 2 試験中に問題冊子の印刷不鮮明、ページの落丁・乱丁及び解答用紙の汚れ等に気付いた場合は、手を高く挙げて監督者に知らせなさい。
- 3 解答は、解答用紙の解答欄にマークしなさい。例えば、

10

と表示のある問いに対して③と解答する場合は、次の(例)のように解答番号10の解答欄の③にマークしなさい。

(例)

解答番号	解 答 欄
10	① ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨

- 4 問題冊子の余白等は適宜利用してよいが、どのページも切り離してはいけません。
- 5 不正行為について
 - ① 不正行為に対しては厳正に対処します。
 - ② 不正行為に見えるような行為が見受けられた場合は、監督者がカードを用いて注意します。
 - ③ 不正行為を行った場合は、その時点で受験を取りやめさせ退室させます。
- 6 試験終了後、問題冊子は持ち帰りなさい。

英 語 (リーディング)

各大問の英文や図表を読み，解答番号 1 ～ 45 にあてはまるものとして最も適当な選択肢を選びなさい。

第1問 (配点 6)

You are interested in starting a local community book exchange. You found this helpful guide.

Starting a Local Community Book Exchange

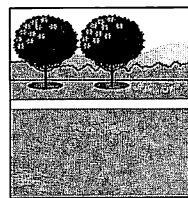

Promote reading and make new friends in your local community!

1. Choose a location

Pick a place that people can easily access. A small outdoor shelf near your home, in a community centre, or in a park are good options.

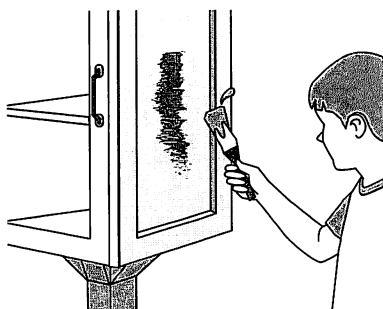

community center

park

2. Gather books and set up the exchange

To make the exchange a success, there need to be some interesting books that people will want to read. You can contribute books from your own collection or ask friends for their old books. Decorate the shelf so that it looks welcoming and interesting. This will make people want to participate.

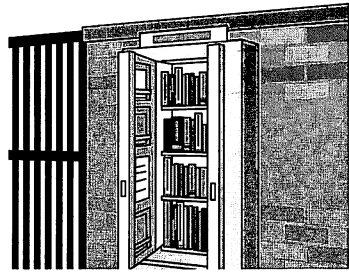

decorating the shelf

3. Maintain the exchange

Make sure the shelf has a roof and a door so that it is protected from bad weather. A lock would be a mistake since we want people to use it freely.

Most shelves should be full, but you need a little room for people to add new books. There should be a sign explaining the process, and if possible, you should install a light that comes on automatically at night. Some people like to leave a notepad for users to leave messages.

問 1 The people most likely to benefit from this guide are 1.

- ① bookstore owners who hope to make people interested in reading
- ② library workers who want to attract new users
- ③ people who enjoy building things with their friends
- ④ residents who want to share books in their community

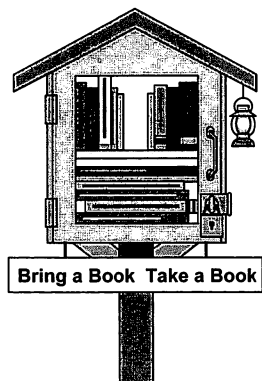

問 2 When setting up a local community book exchange, it is a good idea to 2.

- ① hold the event in good weather
- ② invite friends to come and use the library
- ③ make the book shelf look attractive to people
- ④ seek professional help to design the shelf

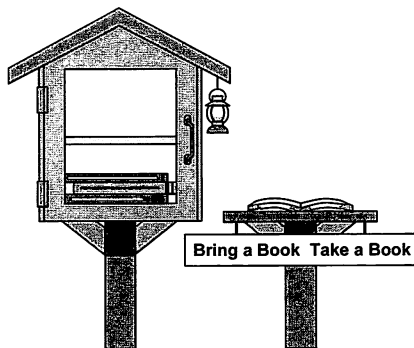

問3 According to the pamphlet, which picture best shows an ideal book shelf?

3

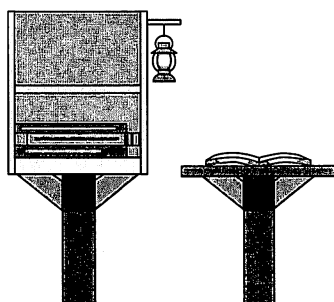

①

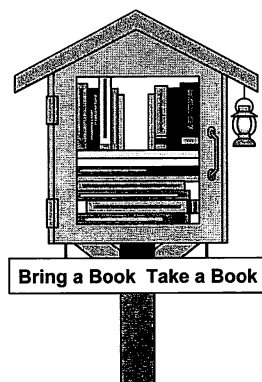

②

③

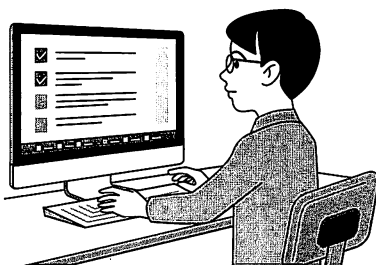

④

第2問 (配点 8)

You are reading an article about the future of exams to prepare for a school debate. The article is about three university professors who are discussing the issue of holding public examinations online.

Online Examinations in the Future?

Online examinations are attracting the attention of educators, and we asked three university professors with experience in online testing for their opinions on this trend. All of them agreed that the flexibility and convenience of online tests was a major plus. Taking tests from home removes the need for travel, sometimes to faraway places. Institutions that hold examinations can also save money on the printing of examination papers and renting of halls. In addition, fewer people are needed to conduct the test and to do the marking and administration. Grading is also cheaper and faster, meaning students get their results more quickly. One of the professors felt that examinations previously held only once a year can now be held more frequently. However, the others thought this could be difficult, as creating the questions is still a long process.

Many people feel it is easier to cheat on online examinations. One professor agreed, saying even if it is possible to monitor test-takers with cameras, cheating is still a major concern. The other two professors pointed out that cheating also happens in paper exams and that anti-cheat software and AI checking actually made online tests more reliable.

All three worried about such issues as Internet connectivity problems and access to computers for poorer people. Two professors felt that testing centers

and local governments could help these examination takers, but the other felt these were not quite ready yet for every examination.

There was agreement that most tests will be online in the future, but one professor felt that more advanced technology and improvements to test design were necessary before moving forward.

問 1 Which of the following did all the speakers agree on? 4

- ① Fewer people are likely to take examinations in the future.
- ② Making online examinations takes more time than making paper tests.
- ③ Online examinations are cheaper for students than paper tests.
- ④ Students who live far away from the test center will find online testing easier.

問 2 Online testing will most likely 5.

- ① be held in smaller, local testing centers
- ② make it cost less to receive paper certificates
- ③ have more questions to answer than paper tests
- ④ require a smaller number of people to check tests

問 3 One professor's opinion is that

6

.

- ① questions should be made more difficult for online examinations
- ② some examinations can be held more often if they are held online
- ③ some institutions are conducting exams online
- ④ students will use cameras to cheat in online examinations

問 4 Which of the following is mentioned in the article?

7

- ① Online tests are not fair if students don't have equal access to technology.
- ② Online tests will be made by AI to prevent students from cheating.
- ③ Testing centers can reduce network troubles by increasing their budgets.
- ④ Testing centers will provide cheaper computers to all poorer students.

第3問 (配点 9)

You are studying film at university in the US. Your teacher asked you to read the following story in the first class.

FILM SCHOOL

"Let's make something unforgettable!" Alex said to the group.

It was our first week of film school, and we had been split into groups of four. Our professor had given us a challenge: create a short film in just one week. We were excited. Alex volunteered to direct. Helen said she could operate a camera, so she was given that duty. Colin agreed to be the editor and our main actor. And because I have always loved writing, I was the script writer. Everyone was feeling positive and planned to impress the professor.

I quickly came up with a story and a script, which I proudly passed to Alex the next day. Alex asked me to make some changes saying, "We don't have time to film all your ideas, Steph." I did as he asked, but I was worried that the story had become too hard to understand. Once we started filming, we found out that Helen was able to operate the camera, but she didn't know anything about recording sound or getting interesting shots. Colin found editing our work almost impossible, and he refused to watch the final film because he was embarrassed about his poor acting skills.

The evening before we showed it to the class, my group sat down and watched the final product for the first time. "We're going to be laughed at!" I thought.

I wasn't wrong. The next day at the screening, everyone except the professor was laughing hysterically. Thankfully, all the other groups had failed just as badly. When the last film ended, we prepared ourselves for some harsh words from the professor. She stood up, smiled, and said, "It wasn't as easy or as

fun as you thought it would be, was it? I wanted you to see how hard it is to create a film.”

Strangely, I felt excited afterward. I couldn't wait to learn how the filmmakers I admired had overcome all the difficulties of making a movie.

問 1 Which person is telling the story? 8

- ① Alex
- ② Colin
- ③ Helen
- ④ Steph

問 2 Choose **four** out of the five options (① ~ ⑤) and put them in the order they happened. 9 → 10 → 11 → 12

- ① The professor explained the purpose of the activity.
- ② The professor expressed her anger at the students.
- ③ The students discovered each other's weaknesses.
- ④ The students discussed their capabilities.
- ⑤ The students formed teams.

問 3 How did the writer most likely feel after the presentation? 13

- ① eager
- ② embarrassed
- ③ nervous
- ④ sad

第 4 問 (配点 12)

In English class you are writing an essay on a social issue you are interested in. This is your most recent draft. You are now working on revisions based on comments from your teacher.

How We Can All Enjoy Kyoto	Comments
When foreign tourists started to return to Japan in 2022, my city, Kyoto, was high on the list of 'must-see' places. After nearly three years of empty hotels, restaurants and shops, we were happy to see people coming back. ⁽¹⁾ ^ The city is now struggling from 'over-tourism.' This essay will highlight the problems and ways to solve it. First, crowding on buses. This is a serious problem that the city has discussed dealing with in a number of ways including charging higher fares for tourists. This will just cause more problems! Let's think of more practical solutions; ⁽²⁾ ^ how about introducing double-decker buses like in London? This would enable twice as many passengers to tour around the city. Second, ⁽³⁾ <u>we all hate trash.</u> Visitors often complain about the lack of trash cans. It would be effective to have more places where people can dispose of their trash. Furthermore, having QR codes on the trash cans would make it possible for visitors to scan them and tell the city if they need emptying outside regular collection hours. Finally, Kyoto has started a campaign to get tourists to visit the rural parts of Kyoto Prefecture. They are taking some measures to attract tourists to the Sea of Japan coast, 'Kyoto by the Sea.' It may be great to encourage locals to offer home-stay style hotels so people can experience not only beautiful scenery but also real Japanese lifestyles. In conclusion, we need to think of more ways in which people can enjoy Kyoto. Let's introduce high-capacity transportation, help keep Kyoto clean, and ⁽⁴⁾ <u>gather people in certain areas.</u>	(1) You are missing something here. Add more information between the two sentences to connect them. (2) Insert a connecting expression here. (3) This topic sentence doesn't really match this paragraph. Rewrite it. (4) The underlined phrase doesn't summarize your essay content enough. Change it.
Overall Comments: Your essay is well thought out. I especially like your idea of double-decker buses.	

問 1 Based on comment (1), which is the best sentence to add? 14

- ① After all, some people are interested in other areas.
- ② As a result, a lot of hotels still have available rooms.
- ③ Because of this, however, some places now have too many tourists.
- ④ Still, the number of tourists hasn't reached the number we expected.

問 2 Based on comment (2), which is the best expression to add? 15

- ① for instance
- ② in contrast
- ③ moreover
- ④ nevertheless

問 3 Based on comment (3), which is the most appropriate way to rewrite the topic sentence? 16

- ① Kyoto City should ask people to buy trash bags
- ② more people should recycle their trash
- ③ the problem of trash must be dealt with
- ④ visitors must take their trash back to their hotels

問 4 Based on comment (4), which is the best replacement? 17

- ① act as representatives of our city
- ② avoid the concentration of people in the city center
- ③ entertain local people
- ④ teach tourists about Japan

第 5 問 (配点 16)

You are a member of an international student club in Canada. To help new international students enjoy their new life in a foreign country, you will help organize an orientation. You wrote this email to the university's international student coordinator and received a reply.

July 15

Event Plan

Dear Ms. Stedman,

I am looking forward to helping with the orientation for new international students next month. You mentioned that this event aims to allow students to feel more comfortable at Fairview University. The orientation schedule you requested is below.

Monday, August 25

Time	Activity & Presenter
9:00 a.m.	Introduction: (undecided) Host: Alice Stedman
Morning theme: Academic resources	
9:15 a.m.	Activity 1: Introduction of the International Student Office Presenter: Alice Stedman
9:45 a.m.	Break
10:00 a.m.	Activity 2: (undecided) Presenter: Zayne Moore
11:00 a.m.	Activity 3: Class registration Presenter: Bailey Garcia
12:00 p.m.	Lunch
Afternoon theme: Adapting to a new environment	
1:00 p.m.	Activity 4: (undecided) Presenter: Ahmed Hadid

2:00 p.m.	Activity 5: Campus tour Tour guides: (undecided)
2:45 p.m.	Break
3:00 p.m.	Activity 6: Student Q&A discussion Participants: International Student Club members
4:15 p.m.	Closing Address: Professor Katherine Lee
4:30 p.m.	End

Please confirm the following details:

- The orientation will start at 9:00 a.m. and end at 4:30 p.m.,
- There will be 20 new foreign exchange students participating.
- The orientation will be held in Room 210.
- Professor Lee will be speaking at the end of the day.

The items below still need to be decided:

- Will a projector be available to use for the activities?
- Do you know what the remaining activities will be?
- Have you decided what you will do for the introduction?
- How will we arrange the tables and chairs for the student Q&A discussion?

The number of students who will act as our tour guides hasn't been decided yet. Once I know this information, I'll send you an email.

When I first arrived in Canada, it was hard for me to get used to life here. So, I think this orientation will be very useful for the new students. I hope that I can help them have an easier time here.

I'm looking forward to assisting during the orientation as well.

Best regards,

International Student Club representative

July 16

Re: Event Plan

Dear International Student Club representative,

Thank you for making the schedule for the orientation. I appreciate your hard work.

The times for each activity look good, and those are the correct starting and ending times for the orientation. As you said, there will be 20 students attending the orientation. There were 21 students who signed up, but one dropped out. This number is fine since we can use the biggest room. Also, I just heard from Professor Lee that she will be unavailable that day, so I will ask someone else to give the speech instead.

To answer your questions, during the introduction, students will get into groups of four and talk about things that they have in common. For the two activities, one is about learning how to search for books, articles, and other resources available on campus. For the other activity, we will use online maps to learn about the various places that international students will find useful when living here in Fairview. Regarding the projector, I am not sure if one is already in the room. Can you call or email the Technology Center and confirm this? If there isn't one, please ask them to set one up for us.

I have attached a diagram for the student Q&A discussion seating arrangements. I plan to use the desks already in the classroom, so we will not need to bring in any large tables. All the club members answering questions will be at the front of the room facing the audience, and they will each need a desk. These desks will be lined up in a straight row. For the international students, let's just use chairs without desks so that they can sit closer and talk in a friendly atmosphere.

Thank you for your help.

Alice Stedman

📎 Attachment: Student Q&A discussion set up diagram

問 1 Based on your email, what is your motivation for helping with the orientation? 18

- ① Assisting students from abroad to adapt to the university
- ② Enjoying interacting with new students
- ③ Improving your communication skills
- ④ Recruiting new club members

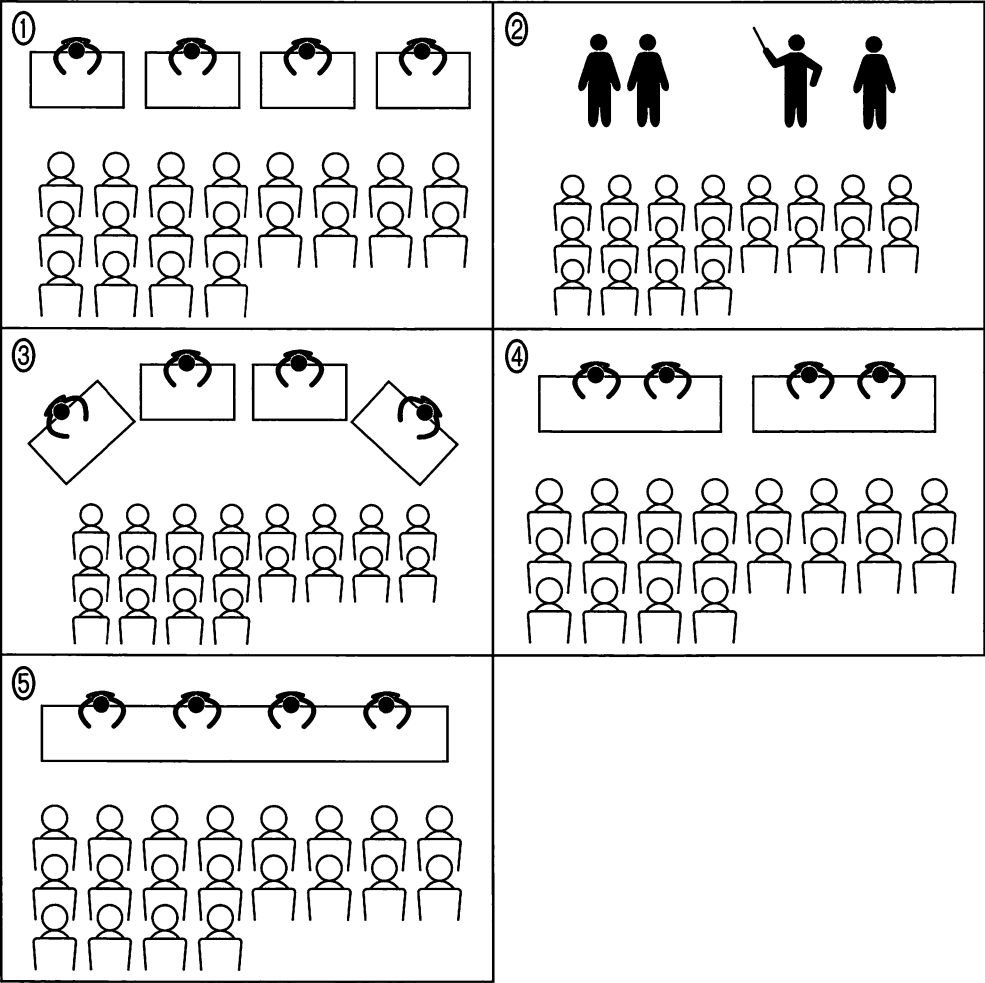

問 2 Which of these titles best match Ms. Stedman's descriptions for Activity 2 (19) and Activity 4 (20) based on the morning and afternoon themes?

- ① Clubs at Fairview University
- ② Effective study habits
- ③ Library and research workshop
- ④ Life in Fairview City
- ⑤ Navigating the classrooms
- ⑥ Supporting students' health

問 3 Referring to Ms. Stedman's reply, which of the following needs to be reconsidered? 21

- ① The introduction activity in the morning
- ② The location of some activities
- ③ The number of international students attending
- ④ The professor giving the closing speech

問 4 Which diagram best represents Ms. Stedman's seating plan for the student Q&A discussion? 22

問 5 You will email Ms. Stedman again. In your reply, which two pieces of information are you most likely to include?

23

A : The arrival time of the guest speakers

B : The equipment available in the room

C : The number of students leading the campus tour

D : The professor's email address and phone number

① **A** and **B**

② **A** and **C**

③ **A** and **D**

④ **B** and **C**

⑤ **B** and **D**

⑥ **C** and **D**

第6問 (配点 15)

You are taking an English course, and it is your turn to introduce a story. You have found a story on a foreign website. You are preparing notes for your presentation.

A Critic's Journey

"You've got to be kidding!" shouted Norman at the television screen. Norman loved movies and television, but sometimes they made him so angry. "These stories could be so much better," he thought. To express his feelings, he began writing funny, angry reviews and posted them on social media sites. People enjoyed his humorous style. Encouraged by the response, he started an online video channel called 'Norman's Soapbox.'

The channel's sharp comments and witty jokes attracted many viewers, and Norman, who was still a high school student, was starting to become famous. His fame and the money the channel had earned enabled him to join the best film and television course in the United States. He moved to New York City and kept making new videos every week in his college dormitory.

Norman shared a room with his classmate Ben. Ben also loved films but had a more positive approach drawing inspiration from the filmmakers he loved rather than those he disliked. He was always busy with original video projects that he would submit to contests and use for job applications. "You should try making a short film," Ben suggested one day. "It would be a great experience for you."

Norman shrugged. "I'm fine with my reviews," he replied, but it wasn't true. Actually, Norman was struggling to find work. He had applied for internships and jobs but was constantly turned down. Feeling frustrated, Norman decided to leave university. "Maybe it's better if I focus on my channel," he thought. It was also because he couldn't bear facing Ben every day. Ben had already found work as an assistant on a real film set, and his career was taking off.

The channel was fairly successful, and his dream of becoming a director faded. The quality of his videos improved and his sharp critiques caught the

attention of people in the film and television industry.

One afternoon, Norman received an unexpected e-mail from Brightbot Films, a production company he had criticized quite often. They wanted to meet with him. Surprised but curious, he agreed.

At the meeting, Ms. Johnson, a senior producer, greeted him warmly. "We've been watching your reviews," she said. Norman was shocked. "Oh no. They've brought me here to scold me," he thought. He had no words. Ms. Johnson smiled, "We believe you have valuable insights. Would you like to work with us as a consultant?"

Norman was surprised. "But you've seen my reviews of your shows," he reminded her. Ms. Johnson kept smiling. "That's exactly why we want you. Your perspective can help us improve." Accepting the offer, Norman began working with the production team. His ideas were fresh and helpful. The company started to see positive changes, and Norman felt proud of his contribution.

After some time, Ms. Johnson called Norman via video chat to talk about his future at the company. "We don't need a consultant anymore," she explained. "But we could use a director."

Norman was no longer enthusiastic about directing. He had seen how hard it was. On the other hand, he couldn't leave the company because his channel was no longer making enough money. Looking at his troubled expression, she added, "You seem to have a dilemma." "Not at all," he lied. "I'd love to."

Norman gave the project all of his attention, working day and night for a whole year. He had made up his mind to create something amazing.

Soon after the movie's release, negative reviews began to appear online. Critics attacked his work harshly, pointing out flaws and making jokes at his expense. Some of the reviewers even seemed inspired by his style from "Norman's Soapbox."

Feeling crushed, Norman realized how difficult it was to create something and put it out into the world. He felt bad about tearing apart others' work without considering their effort. Seeing his disappointment, Ms. Johnson called

him into her office. "I know this is hard," she said gently. "But every creator faces criticism. I still believe in you." Norman nodded slowly thanking her for the support.

That evening, he contacted Ben for the first time in a long time and met up with him. "Now I understand how hard it is," Norman confessed. "All those times I criticized others, I didn't realize what they went through." Ben placed a hand on his shoulder. "If those directors had listened to you, they would have been better filmmakers," he said. "Now, you need to listen to me. Don't give up."

Norman started working closely with Ben. Together, they began planning a new film. Norman read every hurtful comment and negative review of his previous film, making sure not to repeat the same mistakes. Creating the film was a slow process, but three years later, when it was finally released, reviewers praised the story and directing. Norman felt a sense of accomplishment he had never felt before.

A week later, he received an e-mail from one of the online reviewers who had criticized his earlier movie. "I watched your new film," it read. "It's impressive to see what you achieved. Keep up the good work."

Norman thanked her. He knew now that criticism could be helpful if taken the right way. He sent Ms. Johnson a text message expressing his gratitude. "Thank you for believing in me," it said. She texted back. "I always knew you had potential. Are you ready for the next project?" After thinking carefully, he typed, "I'm not sure."

A few months later, Norman finally decided to leave filmmaking, returning his attention to running his channel, now renamed 'Foreman Norman.' The channel had evolved over the years, and now he aimed to inspire others by talking about filmmakers who had learned from their failures.

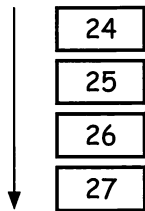

Looking back, Norman realized how much he had changed. He now understood the importance of both giving and receiving constructive criticism. Norman's journey taught him that while it's easy to criticize, it's far harder to create.

Your notes:

A Critic's Journey

Story Outline

Norman starts writing film reviews on social media.

Norman's channel acquires a new perspective.

About Norman

- Studied at the top film school in the USA.
- Total experience as a film director: 28
- How he used his online video channel:
Norman's Soapbox 29.
Foreman Norman 30.

Interpretation of key moments

- Norman did not know what to say when he first met Ms. Johnson in her office because he 31.
- When Ms. Johnson made a video call to Norman, she used the word "dilemma" with him. The dilemma was that Norman 32.

問 1 Choose **four** out of the five events (①~⑤) and arrange them in the order they happened.

24

 →

25

 →

26

 →

27

- ① A critic contacted Norman directly.
- ② Ben got a job on a movie.
- ③ Ms. Johnson criticized a filmmaker.
- ④ Norman quit studying at university.
- ⑤ Norman regretted having attacked creators.

問 2 Choose the best option for

28

.

- ① About 1 year
- ② About 2 years
- ③ About 4 years
- ④ About 8 years

問 3 Choose the best options for

29

 and

30

.

- ① advised people on dealing with criticism
- ② focused on the educational value of failure
- ③ humorously attacked people's creative projects
- ④ recommended films for people to watch
- ⑤ taught how to create an attractive video channel

問 4 Choose the best option for

31

 .

- ① expected some harsh words
- ② forgot his hard criticism
- ③ had not prepared for the interview
- ④ had not seen any of her movies

問 5 Choose the best option for

32

 .

- ① did not know if he had the talent to complete a task
- ② faced a reduced income or a job he was not interested in
- ③ knew he had to make online videos instead of following his dream
- ④ wanted to be a consultant as well as a director

第7問 (配点 16)

You are preparing a presentation for a science project on traditional medicine. You found some interesting information in the article below and are now making your outline.

Ayurvedic Medicine

The idea of health and wellness relates to the state of feeling physically, mentally, and socially healthy and the process needed to achieve this state. Western medicine focuses mostly on physical health with evidence-based approaches. However, many so-called “traditional medicine” practices focus on more than just physical health. Traditional medicine is based on the beliefs and cultural practices of a society. It is often associated with religious or spiritual beliefs and focuses on mental health alongside physical health. One type of traditional medicine is Ayurvedic medicine. It originated in India more than 5,000 years ago. The name comes from the word Ayurveda, meaning the science of life. Ayurvedic medicine focuses on reducing the symptoms of and increasing resistance to disease, reducing stress, and creating a life filled with balance and harmony.

Ayurvedic medicine often uses herbs. These herbs are used to treat a variety of symptoms. Research on the effects of Ayurvedic treatments is limited, but some studies have shown them to have benefits. Ashwagandha, for example, is an Ayurvedic herb that has been shown to promote relaxation. Garlic is used in Ayurvedic treatments to reduce cholesterol, which can cause heart disease. Other herbs can increase cognitive functions, in other words, enhance mental abilities, reduce joint pain, or even regulate hormones, which are chemicals produced by the body.

A benefit of using Ayurvedic medicine is that many of the herbs used can be grown at home. Plants such as lemongrass, ground ivy, aloe vera, and Indian indigo can easily be grown at home. These can be used to make teas, oils, powders, and pastes to be taken as medicine. Growing herbs at home can ensure their quality when used as medicine. It can also reduce the amount of money spent on purchasing products made from these herbs.

As mentioned above, there is limited research on the effectiveness of Ayurvedic treatments. However, there are some clinical trials that show Ayurvedic medicine works. A 2013 study looked into pain relief among 440 participants. They were split into two groups: one group using Ayurvedic medicine, and the other using Western medicine. Seven patients in the Ayurvedic treatment group were removed from the study due to liver function problems; however, the participants in both groups reported similar reductions in pain. Another study on chronic joint pain — pain that lasts three or more months — found that compared to participants who used Methotrexate (MTX), a drug widely used for this treatment, those who used Ayurvedic medicine reported fewer negative effects. The participants using Ayurvedic medicine also experienced positive outcomes similar to those taking the drug.

While the outcomes of the research sound positive, people interested in using Ayurvedic medicine need to understand the commitment that must be made. First and foremost is that no two people are the same, and as such, how long it will take for a treatment to be effective can differ. For some people, three months may be all that is needed for the effects to show, while others may have to wait a year or more. Other Ayurvedic treatments may require lifestyle changes to ensure the medicine is used at strict times, together with the right food, as part of a specific diet.

There are also potential risks with Ayurvedic medicine. First, many Ayurvedic medicines may contain metals or minerals that are known to be dangerous to humans. Additionally, certain herbs contained in these medicines may in fact be toxic. A survey found that 40% of participants using Ayurveda medicine who were offered heavy metals screening had increased levels of lead and mercury in their blood. Exposure to these substances can negatively affect the human body.

While the concerns about Ayurvedic medicine are serious, there is no doubt that the treatments can be effective. Western medicine is beginning to find truth in some of the traditional beliefs these treatments come from.

As with all medical treatments, patients should consult an expert before beginning. Always seek advice from a doctor or a qualified professional. Ayurvedic medicine is worth further study as a potential alternative for those who cannot obtain good results from western medicine for symptoms such as pain or memory problems.

Ayurvedic Medicine

The effects of Ayurvedic Medicine 33

- A. To lower risk of heart disease
- B. To relieve stress
- C. To damage hormones
- D. To improve thinking

34

- Some common plants: Lemongrass, ground ivy, aloe vera, Indian indigo
- Cheaper than buying from a store

Judging Side Effects (from a study on chronic joint pain)

35

Important Things to Remember about Ayurvedic Medicine

- Patients 36.
- Patients 37.

Potential Risks

- Ayurvedic medicine 38.

問 1 Under the heading, “The effects of Ayurvedic Medicine,” you spotted an error in your presentation outline. Which of the following should you remove? 33

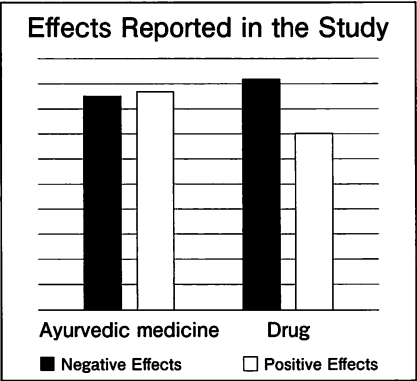

- ① A
- ② B
- ③ C
- ④ D

問 2 Choose the best heading for 34.

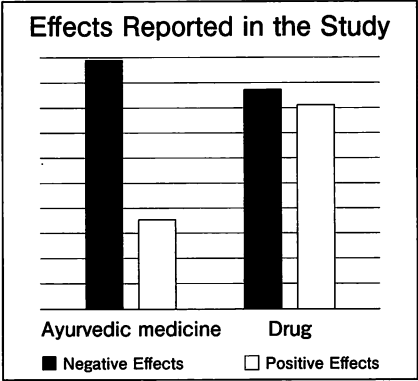

- ① Growing Ayurvedic Medicine at Home
- ② Relying on Common Ayurvedic Medicine
- ③ The History of Ayurvedic Medicine
- ④ Understanding Which Plants to Use

問3 You want to use a figure for the number of negative and positive effects reported in the study on chronic joint pain mentioned in the article. Choose the best option for 35.

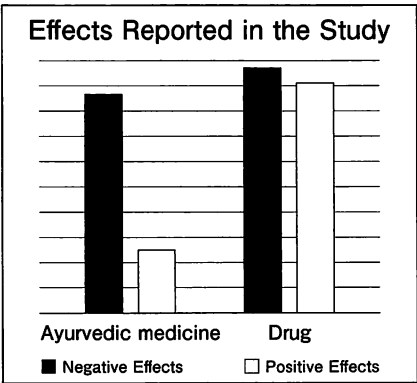

①

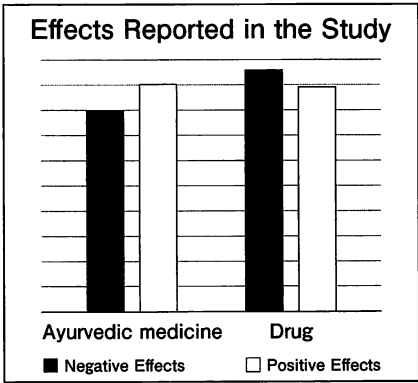

②

③

④

問 4 Choose the best options for **36** and **37**. (The order does not matter.)

- ① who rely on it may also need western medicine to get results
- ② who take it often report results that are unexpected
- ③ who use it may have to follow diet guidelines and other rules to get results
- ④ who use it may wait long periods before a treatment achieves results
- ⑤ who want it may wait for 3 months to see the doctor

問 5 Choose the best option for **38**.

- ① has been shown to elevate patients' heart rates when taken incorrectly
- ② has not been scientifically proven to cure patients
- ③ may raise the amount of harmful substances in the user's body
- ④ may significantly improve blood circulation

第8問 (配点 18)

You are working on an essay about whether or not AI should be used more in our society. You will follow the steps below.

Step 1: Read and understand various viewpoints about the impact of AI on society.

Step 2: Take a position on whether or not AI should be used more in our society.

Step 3: Create an outline for an essay using additional sources.

[Step 1] Read various sources

Author A (Student)

I love gaming, and AI makes games even cooler. For example, I can meet an endless number of unique characters in my favorite online role-playing video game, and they are all created by AI. I don't even have to waste my time searching for new games to play anymore since my AI-powered software can accurately recommend the next great game I will enjoy. But some people do worry about the negative impact of AI, for example the fear that AI will completely take over game designers' jobs. Nevertheless, in my opinion human designers will still be required to complete AI designs and ensure quality.

Author B (Parent)

As a parent, AI on social media scares me the most. It seems like AI just shows kids whatever keeps them online longer, not what's true or good for them. They end up seeing lots of fake news and getting some really weird ideas. Personally, instead of restricting my kids from accessing social media, I'm trying to teach them to be smart online. Still, it's hard when AI is programmed to grab their attention in any way it can. We need to think more deeply about our relationship with technology in order to be able to deal with the new era of AI-created content.

Author C (Business person)

There's no denying that AI in phones and other devices is pretty handy. I love how my phone's AI helps me organize my day and keep track of my health goals. It's like having a personal assistant in my pocket. AI suggestions for shopping and entertainment are highly accurate, which saves me tons of time. Sure, some of my friends complain about the devices knowing a bit too much about their users, but I think the convenience is well worth it. I can leave the boring tasks to my devices and instead focus my thoughts on more complex and meaningful ideas.

Author D (Journalist)

AI's role in the job market is a topic of intense debate. Supporters talk a lot about how it will create new technology industries with all sorts of new jobs, replacing the ones it destroys. The unfortunate truth, however, is that workers whose skills will be of no value because of technological advancements like AI are often middle-aged or older. If AI is not carefully controlled, these older workers may be forced to adapt to entirely different job industries with little support. Workers could face unemployment, leading to financial and emotional stress. Let's think twice before allowing new technology to completely change people's lives.

Author E (Programming teacher)

As a teacher of programming, I have always had to deal with adapting to technological changes every few years. However, I'm concerned that the rapid pace of AI advancements is more quickly than ever before, reducing the importance of the skills I teach students. Moreover, the job market is always changing. These concerns make it hard for me to encourage students to study coding in order to be programmers in the future. Not to mention, there are some real moral dilemmas surrounding AI. I'm particularly concerned about how it might handle our private information in the future.

問 1 Both Authors D and E mention 39.

- ① the challenge of updating school education to keep up with AI advancements
- ② the change in the working world and the usefulness of current skills
- ③ the convenience of AI in daily life and the potential for privacy invasion
- ④ the potential for AI to create ethical dilemmas in the workplace

問 2 Author C implies that .

- ① AI will be able to come up with more complex ideas in the future
- ② every person should hire a personal assistant in order to lead a convenient life
- ③ the problem is that AI learns the personal information of its users
- ④ using AI in daily life has far more advantages than disadvantages

[Step 2] Take a position

問 3 Now that you understand the various viewpoints, you have taken a position on whether or not AI should be used more in our society, and have written it out as below. Choose the best options to complete – (You must have all of – correct to get points.).

Your position: AI enhances our lives by providing us with various new opportunities.

- Authors and support your position.
- The main argument of the two authors: .

Options for and (The order does not matter.)

- ① A
- ② B
- ③ C
- ④ D
- ⑤ E

Options for

43

- ① AI is a useful technology in general, making our daily lives more efficient
- ② AI on social media can solve misinformation problems and has a positive influence on children
- ③ AI will overcome some moral dilemmas that have been challenging to solve
- ④ AI's rapid development in the technology industry promises more job opportunities and economic growth

[Step 3] Create an outline using Sources A and B

Outline of your essay:

AI should be used more in our society

Introduction

While the AI revolution comes with various challenges, it mainly improves our lives by providing us with exciting new opportunities.

Body

Reason 1: [From Step 2]

Reason 2: [Based on Source A] (

44

)

Reason 3: [Based on evidence (

45

) from Source B]

Conclusion

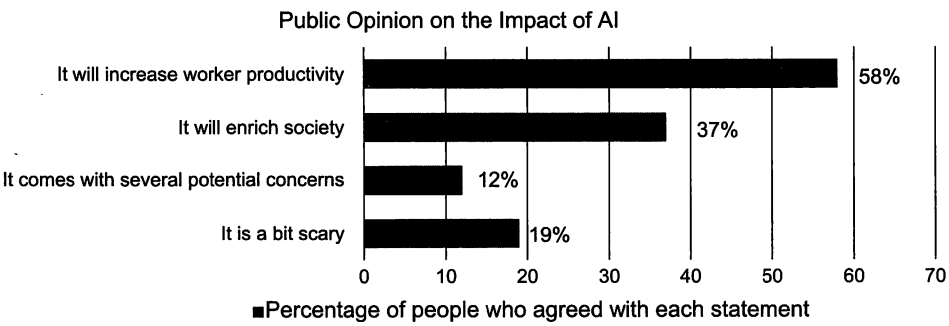

AI development and use should be encouraged in our society.

Source A

The influence of AI on everyday life can be seen in various popular applications. One type of AI, known as a virtual assistant, uses voice recognition and language processing technology to understand human speech and respond to it logically. Unlike previous virtual assistants that had a very limited capacity, these newer AI virtual assistants can provide detailed responses to a user's questions or commands. They are also capable of performing advanced tasks like automatically preparing people's schedules. The result has been a revolution in time management, greatly increasing personal efficiency. Moreover, apps with AI features can make it easier to balance diet and exercise by providing unique diet and exercise plans. They specialize in analyzing individual preferences and fitness levels to create a healthy lifestyle that matches the user's needs. These advances show off AI's role in making daily activities easier to accomplish, which will only change society for the better.

Source B

According to recent studies, the public's view on AI is largely positive. Many who were asked about the topic expressed their belief that it will help workers do their jobs more effectively. While some are worried about issues like job loss, most seem to support AI's potential to improve society as a whole.

問 4 Based on Source A, which of the following is the most appropriate for Reason 2? 44

- ① AI technology has led to an increase in personal efficiency, as it improves our physical ability.
- ② Although virtual assistants are only useful for performing tasks with a limited capacity, this is enough for most people.
- ③ The main benefit of AI in our lives is detailed responses to commands that make entertainment easier to access.
- ④ Virtual assistants can understand and respond to complex human speech, which has greatly improved personal task management.

問 5 For Reason 3, you have decided to write, “AI is being welcomed by many people.” Based on Source B, which option best supports this statement?

45

- ① A majority of people believe AI will have a positive effect on workstyles and society, while a comparatively small number express concern.
- ② Although a significant percentage of people recognize AI’s problems, exactly half think such negative impacts are so small that they can ignore them.
- ③ Over 50% of those surveyed agree that AI has no demerits, with huge public support for its ability to improve society and the workplace.
- ④ While there are some negative opinions about AI, the majority welcome it, with just under 10% of people having a fear of AI.
