

模試 第3回

(100点
80分)

[英 語 (リーディング)]

注 意 事 項

- 1 解答用紙に、正しく記入・マークされていない場合は、採点できないことがあります。
- 2 試験中に問題冊子の印刷不鮮明、ページの落丁・乱丁及び解答用紙の汚れ等に気付いた場合は、手を高く挙げて監督者に知らせなさい。
- 3 解答は、解答用紙の解答欄にマークしなさい。例えば、

10

と表示のある問いに対して③と解答する場合は、次の(例)のように解答番号10の解答欄の③にマークしなさい。

(例)

解答番号	解 答 欄
10	① ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨

- 4 問題冊子の余白等は適宜利用してよいが、どのページも切り離してはいけません。
- 5 不正行為について
 - ① 不正行為に対しては厳正に対処します。
 - ② 不正行為に見えるような行為が見受けられた場合は、監督者がカードを用いて注意します。
 - ③ 不正行為を行った場合は、その時点で受験を取りやめさせ退室させます。
- 6 試験終了後、問題冊子は持ち帰りなさい。

英 語 (リーディング)

各大問の英文や図表を読み、解答番号 1 ～ 46 にあてはまるものとして最も適当な選択肢を選びなさい。

第1問 (配点 6)

You visited a travel website for international tourists and found this notice written by a British author about an event in your city.

Night Market

Experience the sights, sounds, and tastes of our city at the Night Market in East Park, held once a month during the summer. Enjoy an evening walk out of the midday heat while you view the fruits and vegetables our area has to offer. You can also see art, clothing, speciality foods, and other beautiful items made by local people. With special events arranged by local organisations every night, the Night Market is also the perfect place to find out about local hot spots and entertainment.

Event Schedule

23rd May	7 p.m. : Enjoy risotto from Giulia's, a local Italian restaurant
	8:30 p.m. : A comedy show performed by local university students
23rd June	7 p.m. : A drumming and dance performance by the group Rhythm
23rd July	7 p.m. : Enjoy sushi from Morita, a local Japanese restaurant
	8:30 p.m. : Japanese pop music concert by Minato
23rd August	7 p.m. : Cooking demonstration by M's Bakery

- Food stands are open every night of the market from 6 p.m. to 10 p.m.
- All demonstrations and performances are free of charge and will take place on the stage in East Park.
- No pets of any kind are allowed at the market, even on leads or in carriers.

For information on directions and parking, please click [here](#).

問 1 The purpose of this notice is to let people know about 1.

- ① a way to experience the local culture
- ② an annual fruit festival at East Park
- ③ the opening of a new supermarket
- ④ tips for walking safely in the city at night

問 2 On one evening at the Night Market, visitors will 2.

- ① enjoy an Italian music show and eat risotto
- ② enter a dance contest and watch some musical acts
- ③ meet a chef and learn how to play the drums
- ④ see a funny performance and try a local restaurant's food

問 3 If you have a dog and want to go to this event, you will need to 3.

- ① go between 6 and 8 p.m. only
- ② keep away from the stage
- ③ leave your dog at home
- ④ put your dog on a lead

第2問 (配点 10)

Your English teacher gave you an article to help you prepare for the debate in the next class. A part of this article with one of the comments is shown below.

Will Telecommuting Change the Way We Work?

By Nancy Garcia, Los Angeles

31 JULY 2018 • 5:17p.m.

The American Community Survey (ACS) updated their statistics on the telecommuting population in the USA. According to the data, the number of people who work at home for more than half of their working time using digital telecommunications was, as of 2016, 4.3 million; 3.2% of the total workforce. This did not include the self-employed.

David Howe, a business consultant, emphasizes the advantages of telecommuting, saying, "Telecommuting saves employees commuting time, which is useless and painful. For parents with small children, it gives them more time to spend with their children. For employers, it saves them transportation and utilities costs."

On the other hand, Mary Holden, who has experienced telecommuting, says, "Telecommuting has a lot of advantages, but some disadvantages, too. For example, telecommuters tend to have less opportunity to meet other people on business, and sometimes forget the meaning of their work. Additionally, if a teleworker is experienced, there is no problem, but if not, it might be difficult for them to communicate with other people about how he or she should be doing the work. Furthermore, the increase in working hours and the large decrease in pay per hour are also problems."

15 Comments

Newest

Angela Jones 2 August 2018 • 7:20PM

I am also a telecommuter. Despite living in the countryside where I can enjoy the beauty of nature, I can earn enough money by telecommuting. If the number of telecommuters increases, there will be fewer cars on the road and the trains will be less crowded. We can save the environment by just changing the work style.

問 1 According to the article, the telecommuting population means the number of people who 4.

- ① are employed but work at home
- ② aren't employed and work at home using communication devices
- ③ work at home without using any communication devices
- ④ work during commuting hours using communication devices

問 2 Your team will support the debate topic, "Telecommuting should be promoted." In the article, one opinion (not a fact) helpful for your team is that 5.

- ① it is a good way for parents raising children to earn more
- ② more than 5% of the total workforce work as telecommuters
- ③ the commuting time will be shortened
- ④ you can have more time with your children

問3 The other team will oppose the debate topic. In the article, one opinion (not a fact) helpful for that team is that 6.

- ① companies have to pay money such as transportation fees for their workers
- ② if you are not experienced you may have trouble doing your job efficiently
- ③ telecommuting usually gives you a strong sense of achievement
- ④ you will have more opportunities to meet the people with whom you work

問4 In the 3rd paragraph of the article, Mary Holden refers to the possibility of telecommuters 7.

- ① completely understanding why they work in the countryside
- ② decreasing their chance to have new experiences
- ③ earning less money despite having longer working hours
- ④ meeting a lot of people through their job

問5 According to her comment, Angela Jones 8 promoting telecommuting.

- ① has no particular opinion about
- ② partly disagrees with
- ③ strongly agrees with
- ④ strongly disagrees with

(下書き用紙)

英語(リーディング)の試験問題は次に続く。

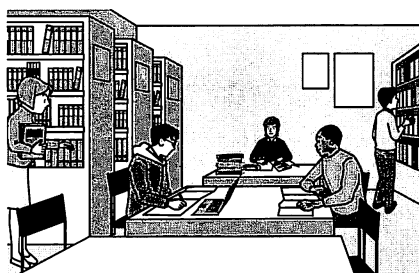

第3問 (配点 9)

You are a senior high school student researching university life. You are reading an online blog post by another senior high school student, Mio, who recently attended an open campus event at an international university in Tokyo.

Discovering My Future at a University Open Day

Last Saturday, I attended an open day at a university in Tokyo. I had always dreamed of attending such a school, but I wasn't sure what to expect. I decided I had to see the school for myself to know if it was right for me.

The day started with a guided tour of the campus. The library, one of the largest I had ever seen, was filled with busy students. Some were deeply focused, but others took the time to smile and wave when they saw our group. I also

visited the laboratories, where I saw some awesome equipment provided by the university for experiments. Our guide explained how these facilities were available to students for both classwork and independent study projects.

Next, we moved on to the dorms. They were huge, with long hallways and hundreds of rooms shared by students from Japan and other countries. What impressed me the most was the activity center, with its billiards tables, table tennis, video games, snacks, and lots of books too. It was great to see students had a place to relax with their friends after classes.

After the tour, I had the chance to speak with some current students and

professors. One student told me about her struggles during her freshman year. However, she said that she got through it thanks to the university's great support system. One professor talked about the importance of building relationships with others. Talking to both of them made me realize that university is not just about studying — it's also about growing as a person.

By the end of the day, I felt much more confident that I had found the university where I wanted to spend the next four years. I left the campus feeling inspired to study as hard as I could for the rest of my senior year of high school.

問 1 Mio's blog post also included students' comments (①~④) describing the events during the open day. Put the comments in the order in which the events happened. 9 → 10 → 11 → 12

①

I had never thought about how much college changes us. The people around us have a big impact on our lives.

②

I started thinking about my future projects! That's way more exciting than my regular homework.

③

I was touched by the students concentrating on their studies, surrounded by many books.

④

It's also important to be able to have a good time and hang around after a hard day of studying.

問 2 During the open day, Mio did **not** 13.

- ① play table tennis
- ② speak to a professor
- ③ talk to a student
- ④ visit a laboratory

問 3 At the end of the open day, Mio likely learned the university 14.

- ① lacks good support
- ② offers many sports
- ③ separates different students
- ④ suited her well

第 4 問 (配点 12)

In English class you are writing an essay on a social issue you are interested in. This is your most recent draft. You are now working on revisions based on comments from your teacher.

Under One Clean Sky	Comments
I saw a picture of Tokyo in the 1980s in my history class last week. I was shocked. The skyline was barely visible because of the air pollution. A lot has changed since then but I think we need to work harder to solve the problem on a global scale. The WHO estimates that almost 7 million people die each year due to air pollution! In this essay, I would like to consider what we can do. First, there needs to be a bigger move towards electric cars and buses, since air pollution is mainly caused by gasoline-powered cars. ⁽¹⁾ ^ Take a look around and you will see the main reason. Because there are not enough charging stations, buying an electric vehicle (EV) is not practical for most people. I think the government needs to make EVs the cheaper and more convenient option. Secondly, Japan needs to follow the lead of other environmentally advanced countries and introduce designated areas called LEZs, Low Emission Zones. Basically, drivers of vehicles that don't meet the low emission standards have to pay money to enter the LEZs. At present the Japanese policy seems to be to just hope that people buy eco-friendly cars. ⁽²⁾ ^ European cities are taking positive action to encourage people to do more. Finally, ⁽³⁾ <u>it's time to show that you care!</u> We need to plant more trees in city centers. As well as helping reduce air pollution by sucking up carbon dioxide, they would also provide shade for shoppers on hot summer days.	(1) You are missing something here. Add more information between the two sentences to connect them. (2) Insert a connecting expression here. (3) This topic sentence doesn't really match this paragraph. Rewrite it.

In conclusion, although Japan is a lot cleaner than it was in the past, we still must play our part as global citizens. We should promote the use of electric cars, (4) know more about controlling toxic gas, and work on further greening our cities. What we do here affects the entire global eco-system.

(4) The underlined phrase doesn't summarize your essay content enough. Change it.

Overall Comments:

Overall, it is well-written. It would be perfect with a few minor revisions. (I agree with your suggestion of creating LEZs in Japan! 😊)

問 1 Based on comment (1), which is the best sentence to add?

15

- ① As of 2023, electric cars were cheaper than gasoline cars.
- ② As of 2023, most people liked to drive electric cars.
- ③ As of 2023, only 3% of cars in Japan were electric.
- ④ As of 2023, taxi companies were already using electric cars.

問 2 Based on comment (2), which is the best expression to add?

16

- ① In contrast
- ② In particular
- ③ Nevertheless
- ④ Otherwise

問 3 Based on comment (3), which is the most appropriate way to rewrite the topic sentence? 17

- ① greener means cleaner
- ② let's stop driving cars
- ③ no more shopping in summer
- ④ save the planet, take the bus

問 4 Based on comment (4), which is the best replacement? 18

- ① become more useful to the planet by
- ② create new vehicles which are suitable for
- ③ keep up with other environmentally advanced countries in
- ④ make more financial contributions for the purpose of

(下書き用紙)

英語(リーディング)の試験問題は次に続く。

第5問 (配点 16)

You are a member of a volunteer committee in your town. You are making a handout for a community meeting about improving a public park, based on the following article and questionnaire of local residents.

The ABCD of Active Communities

Alex Johnson, community organizer

Communities have traditionally been groups of people with common interests who live near one another. As people focus more on online connections, involving people in their local communities has become difficult. The ABCD (Asset-Based, Community Development) model helps with this problem by focusing on a community's assets — or resources — rather than what it is missing. By encouraging everyone to look at their individual strengths, communities can manage their own growth and find lasting solutions. The community assets can be grouped into five different categories.

People themselves make up the first asset. Individuals have unique skills and experiences that can help the community. For example, a carpenter might help repair public spaces. When a community recognizes and benefits from the strengths of its members, it creates a sense of pride and belonging. This encourages more people to work together on projects useful for all.

The second asset is associations. These are groups of people who come together to share a common interest or purpose, such as sports clubs or cultural groups. Associations often have strong networks that can be used to organize community projects.

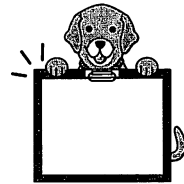

The third key asset is local institutions, such as schools and businesses. As they offer services and jobs to the community, the success of the community depends on them. One local business might sponsor a community event or provide space for meetings. Working with institutions ensures that communities can get the resources they need.

Location-based assets, like parks, buildings, roads, and lands, form the fourth asset. These spaces and cultural activities together help shape the community's identity. They give people places to gather and strengthen their

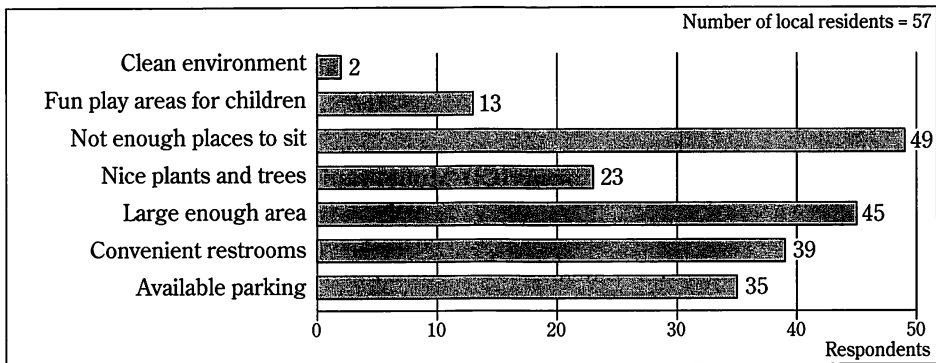

sense of belonging.

Finally, exchange or interaction — the relationships between the local economy and the people — is a key asset for a strong community. These connections make the community richer, build trust and make it easier for resources or information to be shared. Strong social ties ensure that everyone feels included and can work together to solve problems.

Results of Questionnaire

Q1: Choose all items that match your opinions on the current park.

Q2: What ideas do you have for improving the park?

Main Comments:

Respondent 1 (R1) : Not many people can use the park when the weather is bad. I'm a construction worker, and I think I could get some co-workers to help build more all-weather areas.

R2: I would be happy to donate some trees from my tree farm to provide more shade. This will be nice on hot days. Also, I suggest adding a playground, so families can enjoy the park more.

R3: I'm disappointed at how much garbage there is on the ground. Maybe I could organize a volunteer group to pick up trash regularly.

R4: I like to relax at the park, but I think we need more places to sit. It would be great if they also had roofs over them so it's not too hot in the summer.

R5: Let's encourage everyone to work together! This is a great way to make connections in the community.

R6: My family loves gardening, but we have limited space. Some of our neighbors are also into gardening, so we could work together to help create a community garden!

Your discussion handout:

Park Improvement Project

■ The ABCD Model

- ABCD = Asset-Based Community Development
- What it is: 19

■ Recommendations Based on ABCD Model and Questionnaire Results

- People:
Individuals = different skills
- Associations:
Nature club picks up garbage or 20.
- Institutions:
21

- A. Furniture corporation makes tables.
- B. Local government adds more signs.
- C. Neighborhood art lovers create artworks.
- D. School offers playground equipment.
- E. Tree farm company provides free trees.

- Place-based resources:
Buildings, roads, lands
- Social connections:
Relationships among people

■ Other important points:

- The majority of people think the park 22.
- As R1 and 23 mentioned, it needs more covered areas. Then the park could be used in rainy weather.
- Many people do not agree that the park's environment is clean, and a volunteer group may be needed to change the situation, as the graph and 24's comment shows.
- Although the goal is to improve the park, we should still focus on developing community relationships, as R5 said.

問 1 Choose the best option for 19.

- ① A method for institutions to select the best communities for their business
- ② A process for organizations to raise money in their communities
- ③ A strategy for using the current strengths of communities to improve them
- ④ A system for helping communities identify and fix their biggest problems

問 2 Choose the best option for 20.

- ① a construction company repairs public roads
- ② a gardening group starts a community garden
- ③ a local restaurant provides residents with a place for cultural exchanges
- ④ a parent supervises children at the playground

問3 You are checking your handout. You notice an error concerning Institutions. Which of the following should you remove? 21

- ① A
- ② B
- ③ C
- ④ D
- ⑤ E

問4 Choose the best options for 22 and 23.

22

- ① doesn't have enough seating areas
- ② has beautiful green spaces
- ③ is usually too crowded
- ④ isn't safe enough for children
- ⑤ should have better restrooms

23

- ① R1
- ② R2
- ③ R3
- ④ R4
- ⑤ R5
- ⑥ R6

問 5 Choose the best option for 24.

- ① R1
- ② R2
- ③ R3
- ④ R4
- ⑤ R5
- ⑥ R6

第6問 (配点 15)

You are taking part in an English reading club at school. Each student was asked to read a short story in English, prepare notes and introduce the story to other students. You are preparing your notes now.

High School Rock

As Eric and Bill drove slowly down a narrow street, Bill pointed at a house. "I think that's it," Bill said.

"Do you think he'll agree to it?"

"We have to ask first."

Eric and Bill were on their way to see Adam. The three friends had played in a band together in high school but hadn't seen each other since Adam went to college.

When Eric's family moved to town during the middle of his freshman year in high school, he wasn't keen on socializing. He mostly kept to himself. However, he had been playing the drums for nearly two years, so he decided to join the music club.

One day, during a club meeting, Adam asked Eric, "What type of music do you enjoy?"

"Mostly rock."

Adam started to strum a simple tune on his guitar. "See if you can match a beat to this melody."

Eric listened intently as Adam played the melody. A minute later, Eric began banging the drums. The club room became completely silent as the members listened. Eric's drum beat matched perfectly.

After the meeting, Adam walked over to Eric. "Just so you know, everyone here thinks you're brilliant. How about being the drummer for me and my friend Bill?"

"I've never played in a band before."

"Well, you do now! We just need a band name."

Then, Eric soon hit it off with Bill, too, and their band "The Beat" kicked

off. Adam took the lead as vocalist and bassist, and Bill took part as guitarist. At first, Eric was amazed to hear it had been just half a year since Bill started practicing the guitar.

Adam and Bill met during their first week of high school. By then, Adam was already an experienced guitarist, but Bill had just started. They would often hang out at each other's houses watching TV, but one day Bill noticed a guitar and a bass in the corner of Adam's room. "I didn't realize you play the guitar."

"My dad's been teaching me since I was seven," said Adam.

"My parents bought me a guitar last month. I've been practicing, but I'm still a beginner."

Bill did his best to play a tune for Adam. Adam spent the rest of the afternoon teaching Bill how to grip the guitar properly. They practiced chords and played their favorite songs, and from that day on, spent every afternoon like they were rehearsing for a concert.

Months raced by, and Bill went from slowly playing a few songs to keeping pace with Adam. One day, Bill looked at Adam and exclaimed, "We should try to perform at the café."

"You've got to be kidding me!" said Adam questioningly.

"If you'd asked me to play in front of a crowd at the beginning of the school year, I would have been terrified. But now, I'm convinced I can perform in public."

The next day, they went to the café to ask if they could play.

After high school, Eric and Bill made the decision to take a gap year, a year-long break from studying, before attending college. But Adam accepted a scholarship to major in business at his college of choice. While Adam set off for college, Eric and Bill formed a new band with a new member to replace Adam. Their new band was so successful that they eventually decided to keep touring rather than attend college.

Years later, while they were back home from a tour, Bill received a phone call from their high school class president. He promptly called Eric afterward.

"Hey Eric. Sorry to disturb you, but I just got an unexpected phone call.

Our high school reunion is coming up, and our class president wants you, me, and Adam to perform.”

“Wow,” said Eric. “I can’t believe it.”

“I know, but I’m a bit sad thinking about it. The last time I talked to Adam on the phone was when he graduated from college. That was literally five years ago.”

Eric felt regretful that he too hadn’t made an effort to keep in contact with Adam, “Has it really been that long?”

“It has. I’m not sure how to ask him.”

Adam stared at his friends, “I’m so happy to see you both. How has it been, touring?”

“Great,” said Bill, “but it would have been better if you had joined us.”

“You guys don’t have to be concerned about me. I’m not angry or anything like that.”

“Oh, we know,” said Eric, “but we neglected our best friend.”

The three guys spent the afternoon talking and catching up. Adam talked about his job, and Bill and Eric talked about touring with their band. Eventually, the high school reunion came up.

“That’s why we came to see you. We were asked to get the band back together to play,” said Bill.

Adam sighed, “I haven’t played much, and I’d have to get my bass out of storage.” He thought about it for a couple of minutes before smiling widely. “Yes!”

On the night of the high school reunion, the three friends performed in front of their old classmates. It was the first time they had played together in front of a crowd since high school. Everyone was thrilled to see them on stage again.

Later that evening, they sat down to have a couple of laughs talking about the good old days. Adam felt emotional as other classmates came to congratulate them.

After a while, Adam looked at Eric and Bill and said, “I am fortunate to have you as friends. Even after drifting apart, tonight was just like ten years ago. I forgot how much I love playing music.”

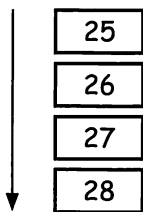

Before the night ended, they all agreed to play together again at the next school reunion. Adam, especially, couldn't wait to pick up his bass again.

Your notes:

High School Rock

Story Outline

Adam, Bill, and Eric start high school.

They perform at the high school reunion.

About Adam

- Age: 29
- In high school, Adam helped...
 - Eric 30.
 - Bill 31.
- He went to college to study for a business degree.

Key moments in the story

- Eric and Bill feel guilty when they talk about their high school reunion because they 32.
- Adam says he is fortunate to have Eric and Bill as friends because they 33.

問 1 Choose **four** out of the five options (①～⑤) and rearrange them in the order they happened.

25

 →

26

 →

27

 →

28

- ① Adam asks Eric to join his band.
- ② Bill contacts Eric to talk about the school reunion.
- ③ Eric and Bill perform with their new band.
- ④ Eric and Bill show up at Adam's house.
- ⑤ The three friends record an album.

問 2 Choose the best option for

29

.

- ① early 20s
- ② late 20s
- ③ early 30s
- ④ late 30s

問 3 Choose the best options for

30

 and

31

.

- ① become a better guitarist
- ② choose a guitar at the shop
- ③ learn to play a new instrument
- ④ realize how well he could play music
- ⑤ start a band after high school

問 4 Choose the best option for

32

.

- ① aren't able to attend the event
- ② aren't as successful as Adam
- ③ haven't received an invitation
- ④ haven't talked to Adam recently

問 5 Choose the best option for

33

 .

- ① convinced him to go to college
- ② encouraged him to socialize more
- ③ helped him succeed as a professional musician
- ④ reminded him of his passion

第7問 (配点 16)

You are preparing a presentation for your science club, using the following passage from a science website.

Desalination: A Solution to the World's Water Problems?

Fresh water is very important for life, but many people do not think about where it comes from. We use water every day for many activities. However, we often forget that fresh water comes from lakes, rivers, and sources under the ground, and these water sources are limited. Therefore, we need to be careful to save water and not waste it. Without fresh water, it would be hard for people, animals and plants to live.

Water shortages happen when there is not enough clean water for people to use. This can be caused by pollution, or by growing demand due to an increase in the population. In addition, some countries have dry weather and do not get enough rain. When there are water shortages, it leaves less water for drinking, cooking, washing, industry, and agriculture. The water shortage problem is even seen in countries that are close to oceans. Even though these countries are surrounded by water, the water contains salt and they cannot use the salt water without treating it first.

Desalination is the process that makes salt water from the ocean safe to drink, by removing the salt and other harmful substances. It can therefore help people in places near the ocean where there is not enough fresh water. There are several methods of desalination. One method is called "reverse osmosis" and it involves several steps. First, salt water is transported from the ocean to the desalination plant. Then, the water goes through special filters to remove sand and other large particles. Next, the water is put through a thin layer of material called a membrane to remove the salt. After that, minerals and other chemicals are added to the water to make it clean. This ensures that it is drinkable and stays safe. Finally, the clean water is distributed to people and businesses to consume. Access to clean water is important because it can prevent problems caused by water shortages like hunger, disease and other

medical conditions, fewer economic opportunities, and even conflicts.

One advantage of desalination is that it can provide a large amount of fresh water for drinking, farming and industry, in any season. Saudi Arabia is a good example of a desalination success story. It is a very dry country, but it uses desalination to make fresh water from the ocean. In fact, Saudi Arabia currently has over 40 desalination facilities and produces more desalinated water than any other country. Thanks to desalination, the country has enough water for human and economic development. Many of the most successful desalination projects are in countries in the Middle East with a lot of deserts and few natural sources of fresh water.

Another advantage of desalination is that it could help avoid water wars between countries by giving them another way to get fresh water. For example, tensions are rising between Egypt and Ethiopia over the Nile River. Egypt depends on the Nile for almost all of its fresh water. However, Ethiopia has launched a project to build a large dam on the river to generate electricity. Egypt worries that the dam can reduce the amount of fresh water flowing north from Ethiopia to Egypt. Egypt is now building seawater desalination facilities to get fresh water from the ocean instead of depending on the river.

Desalination facilities can be helpful, but they have some disadvantages. The technology and equipment needed to clean the salt water is expensive. Because of this, it can cost hundreds of millions of dollars to build a desalination facility. That is why most facilities have been built in wealthy countries. Furthermore, the facilities use a lot of electricity to clean the water and transport it. This also costs a lot of money.

In addition to being very expensive, desalination facilities can cause problems. For example, desalination creates waste called “brine”. Brine is very salty water. The brine is often put back into the ocean. This can harm sea life because it makes the water too salty. Another problem is that most desalination facilities use fossil fuels like coal, gas, or oil. This causes air pollution and contributes to climate change.

Desalination is just one way that we can increase our supply of fresh water. Whether you live in an area with a lot of fresh water or not, it is important to keep our water clean and drinkable. So, the next time you drink a glass of water or take a bath, think about where your fresh water comes from.

Presentation slides:

Desalination: A Solution to the World's Water Problems?

1

Water Shortages

Causes:

- pollution
- too much use
- little rain

Effects:

- not enough food
- 34
- weak economy

2

A Desalination Process “Reverse Osmosis”

The steps in this desalination process include ... 35

A: taking water from the ocean.

B: removing large materials.

C: taking out salt.

D: heating water for safety.

E: adding some chemicals.

3

Advantages of Desalination

Desalination can...

- 36
- 37

4

Disadvantages of Desalination

38

5

Closing Remark

39

6

問 1 Which of the following is an effect of water shortages shown in Slide 2?

34

- ① high energy prices
- ② hot weather
- ③ poor health
- ④ unfair business practices

問 2 Which is an **error** you found on Slide 3?

35

- ① A
- ② B
- ③ C
- ④ D
- ⑤ E

問 3 Choose two options for Slide 4. (The order does not matter.)

36

37

- ① ease tensions between countries.
- ② help countries without access to fresh water.
- ③ increase electricity generation in African countries.
- ④ lower the cost of water for all people.
- ⑤ provide water to countries far from the ocean.

問 4 What can be inferred about the disadvantages of desalination for Slide 5?

38

- ① Desalination reduces the amount of salt in ocean water, which harms fish living near desalination facilities.
- ② More advanced technology needs to be developed before more desalination facilities can be built.
- ③ Oil spills from desalination facilities can result in nearby oceans having high levels of water pollution.
- ④ Some countries suffering from water shortages cannot afford to build desalination facilities.

問 5 Choose the most appropriate remark for Slide 6.

39

- ① Fresh water is more important than the development of agriculture and industry.
- ② Human beings have long waited for the technology to change sea water to drinking water.
- ③ Preventing war in dry regions is the most important issue facing the world today.
- ④ Protecting the environment and making sure water-scarce countries have fresh water are both important.
- ⑤ Rich countries should help poor countries to gain access to clean water.

第 8 問 (配点 16)

You are working on an essay about whether positive discrimination for gender should be used by companies in Japan. Hiring more women in jobs where there is low female participation, such as managerial roles, could be one solution. You will follow the steps below.

Step 1: Read and understand various viewpoints about positive discrimination and the use of gender quotas, for example, fixed allocation of women in employment.

Step 2: Take a position on companies introducing positive discrimination.

Step 3: Create an outline for an essay using additional sources.

[Step 1] Read various sources

Author A (University student)

I think that positive discrimination should be used by more companies. We often think that the word “discrimination” is a bad thing, but the problem is that many companies have more male than female managers. The average salary of women is also lower and people in the top jobs are usually men. This is clearly unfair. Half the population is made of women and half the people working in top jobs should also be female. I worry about my future as I study hard, and I want to have the same opportunities as men. A quota of 50% women would create more diverse and fairer workplaces.

Author B (Economics professor)

Around the world, various countries are introducing laws to tackle the gender gap in the workplace. Some of these laws include positive discrimination measures, such as the one introduced by Norway in 2008. This law obliges companies to employ women in at least 40% of managerial roles. However, it is not always necessary to introduce positive discrimination to achieve a fairer workplace. Many countries focus on just having equal pay for equal jobs, not on hiring more women. For example, companies in Iceland must prove that male and female workers earn the same salaries for the same jobs.

Author C (Company director)

Our company believes in giving equal opportunities to anybody, regardless of their gender, race or background. However, we are against what people term “positive discrimination.” We feel that discrimination is discrimination. We need to hire the best person (male or female), but this view would prevent us from doing that. Let’s say that a managerial position became open, but the most qualified candidates for this position were men, because a few decades ago we already hired more men than women. Nevertheless, should we have to promote a woman who was less qualified? This doesn’t make sense in business.

Author D (Politician)

In the world of politics, over 130 countries have introduced quotas for women and this form of positive discrimination has had an enormous effect, increasing the number of female politicians and leaders worldwide. The effect of greater female participation in politics has led to a wider range of views and policies in a positive way. Also in the business world, when women receive the same opportunities as men, studies show companies achieve more stability and try to have more opportunity for development. More studies are needed, but I am fully in favor of obliging businesses to make sure that half their managers are female.

Author E (Mother of a high school boy)

As a woman, I’d like to support the idea of quotas. I feel I would have had more chances to get a better job when I was younger. On the other hand, I can’t help thinking that this would affect my son’s chances of getting the kind of job he is suited to. He studies hard at school and is aiming for a top university. What I worry about is that, despite gaining qualifications and experience, he may lose out on a job that he wants just because he is male. Women should try for positions based solely on their own talent.

問 1 Both Authors C and E mention that

40

.

- ① a qualified male candidate might lose a position to a female who is less qualified than he
- ② companies will always hire the best candidates for new jobs, regardless of the candidate's gender
- ③ it would be difficult for any man in the future to get a good job if he doesn't have a high level of education
- ④ women should be promoted based on their own ability, not by being given priority because of their sex

問 2 Author B implies that

41

.

- ① countries such as Norway have created a successful model that should be adopted around the globe
- ② it's far better for companies to introduce laws for equal pay rather than for positive discrimination
- ③ the positive discrimination model has not worked so well since 2008, so other countries are not following it
- ④ there may be a role for positive discrimination, but other methods may be equally or even more effective

[Step 2] Take a position.

問 3 Now that you understand the various viewpoints, you have taken a position on positive discrimination in favor of gender equality, and have written it out as below. Choose the best options to complete

42

 –

44

. (You must have all of

42

 –

44

 correct to get points.)

Your position: The use of quotas and positive discrimination is an effective method for promoting gender equality in the workplace.

- Authors

42

 and

43

 support your position.
- The main argument of the two authors:

44

.

Options for

42

 and

43

 (The order does not matter.):

- ① A
- ② B
- ③ C
- ④ D
- ⑤ E

Options for

44

:

- ① Companies that have a 50% quota for women would be more competitive as they would save money on hiring and salaries
- ② Creating more chances for women to work in top jobs increases the variety of ideas and views
- ③ Having a larger number of women in a company will also influence the political world and lead to more diverse governments
- ④ More than 50% of women would be able to gain higher salaries and help companies to arrange a better workplace

[Step 3] Create an outline using Sources A and B

Outline of your essay:

**Companies should introduce positive gender discrimination
for managerial positions**

Introduction

The use of positive discrimination in the workplace by creating strict quotas for female managerial employees is a necessary step to improve gender equality and build stronger businesses in the future.

Body

Reason 1: [From Step 2]

Reason 2: [Based on Source A] (45)

Reason 3: [Based on evidence (46) from Source B]

Conclusion

Despite some opposition, studies support the creation of gender quotas in managerial positions, and companies should act on this quickly, for a better workplace and a fairer society.

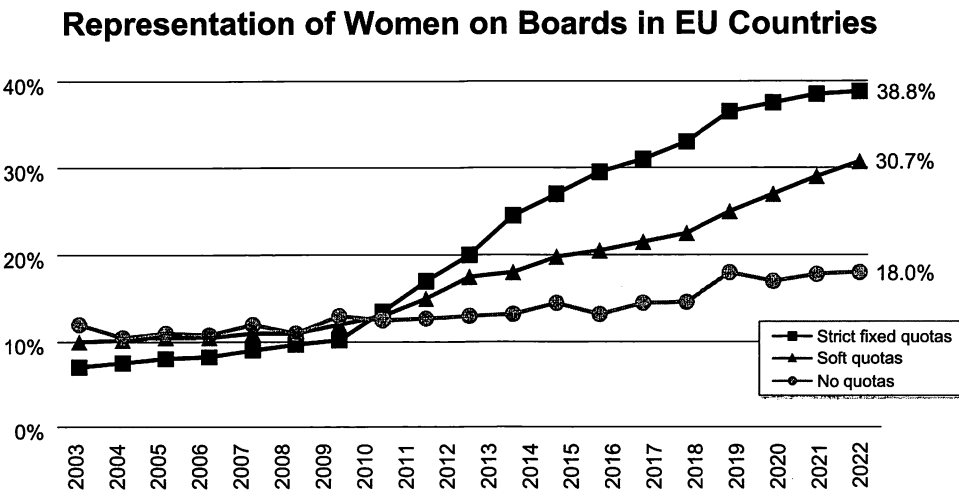

Source A

In the US, there is criticism of quotas due to feelings of unfairness and the idea that unqualified candidates would take positions from qualified ones. But why do we assume that women or people from minority groups are unqualified? Is it really the case that there would be no qualified female candidates for a job? People are quick to reject the idea of positive discrimination as something that “doesn’t work” without ever showing evidence or proof. The fact is, quotas do work, and they work well. A recent study showed that positive discrimination

in the workplace is effective for business. Companies with more diversity often perform better than their competitors. According to the *American Journal of Political Science*, companies with quotas for more women have better working conditions for everybody, including the men. These companies have a healthier working culture and keep employees for longer and are generally better places to work. People may say quotas are undemocratic, but the results say otherwise.

Source B

Beginning in 2012, several European companies set quotas for the percentage of women on company boards (the highest positions in the company). Some companies set a strict fixed quota (the proportion which they had to achieve) of 40%, others set a soft quota (more of a target than a fixed rule) while a third group had no quota. The table shows the average rise in female representation in each of the three groups.

問 4 Based on Source A, which of the following is the most appropriate for Reason 2?

45

- ① Although some women may be unqualified, they help to create a better atmosphere in the company through a healthy working culture.
- ② Evidence shows that introducing a quota not only improves the performance of a business but also motivates employees to remain in the company.
- ③ Having a quota helps minority groups and women to gain the right qualifications to work in better places that perform well.
- ④ Women have better working conditions than men due to the quotas, and so stay at the company for a long time.

問 5 For Reason 3, you have decided to write, “Setting strict fixed quotas will effectively increase the percentage of women in managerial positions, increasing women’s motivation for work and contributing to stronger businesses.” Based on Source B, which option best supports this statement?

46

- ① A strict fixed quota eventually leads to a higher number of women in senior positions. However, it takes a much longer time to increase these numbers than a relatively soft quota.
- ② Companies without a strict fixed quota mostly already had more female staff. The number of women rose more quickly in these companies as they already had a head start.
- ③ Setting a soft quota is most effective in helping companies to increase the number of women in managerial positions. It encourages women already working in the company to apply for higher level jobs.
- ④ Soft quotas work to some extent, producing a definite increase in the number of women in management. Nevertheless, a strict fixed quota provides a quicker increase, slowing only when the target is almost reached.
