

模試 第6回

(100点  
80分)

[英 語 (リーディング)]

注 意 事 項

- 1 解答用紙に、正しく記入・マークされていない場合は、採点できないことがあります。
- 2 試験中に問題冊子の印刷不鮮明、ページの落丁・乱丁及び解答用紙の汚れ等に気付いた場合は、手を高く挙げて監督者に知らせなさい。
- 3 解答は、解答用紙の解答欄にマークしなさい。例えば、

|    |
|----|
| 10 |
|----|

と表示のある問いに対して③と解答する場合は、次の(例)のように解答番号10の解答欄の③にマークしなさい。

(例)

| 解答番号 | 解 答 欄             |
|------|-------------------|
| 10   | ① ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨ |

- 4 問題冊子の余白等は適宜利用してよいが、どのページも切り離してはいけません。
- 5 不正行為について
  - ① 不正行為に対しては厳正に対処します。
  - ② 不正行為に見えるような行為が見受けられた場合は、監督者がカードを用いて注意します。
  - ③ 不正行為を行った場合は、その時点で受験を取りやめさせ退室させます。
- 6 試験終了後、問題冊子は持ち帰りなさい。

# 英 語 (リーディング)

各大問の英文や図表を読み、解答番号 1 ～ 45 にあてはまるものとして最も適当な選択肢を選びなさい。

## 第 1 問 (配点 6)

You visited your town's English website and found an interesting notice.

### International Food Festival

### “Food Brings Us Together”

Our town has a rich history as a place where people from many different parts of the world have come to live and work together. There is no better way to get to know one another than by eating together and telling stories about the special dishes of our native regions.

This fall we will celebrate our town's diverse history with an international food festival. The festival will include cooking demonstrations, talks, and other events. We also invite you to join us in a town recipe exchange. Write out instructions for your favorite regional or family dish for others to bring home, and pick up a recipe from one of your neighbors.

#### Festival Schedule

|           |                                                                                                                                                                                      |
|-----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| August 17 | Cooking demonstration:<br>11 a.m.: “Banana Scones” (United Kingdom)<br>3 p.m.: Live international music stage: “Joie”<br>(French café music)                                         |
| August 18 | Talk & tasting:<br>1 p.m.: “Coconut water, lime soda, and other cold<br>summer drinks” (Vietnam)<br>3 p.m.: Live international music stage: “The<br>Goldens” (American gospel group) |

August 19

Cooking demonstration:  
1 p.m.: "Fish Tacos" (Mexico)

- The recipe exchange and food stalls will be open from 11 a.m. to 5 p.m.
- Admission is 500 yen for ages 13 and up. The admission ticket comes with a 500-yen coupon that can be used for one purchase over 1,000 yen from a food stall.
- All events will be held in the town hall.

問 1 One purpose of this notice is to find people from the town who want to

1

- ① add stories to a town history book
- ② cook food for an international festival
- ③ eat dinner with their neighbors at a fancy restaurant
- ④ share information about their favorite dishes

問 2 People who go to the festival won't be able to

2

- ① hear music from other countries
- ② see cooks make several dishes
- ③ try some cold drinks
- ④ watch a cooking contest

問 3 You should keep your admission ticket to

3

- ① exchange it for a recipe
- ② get a discount when you buy some food
- ③ get a free private cooking lesson
- ④ sit in a special section at the concerts

## 第2問 (配点 8)

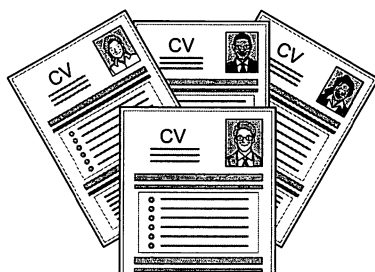

You are in the second year of university and thinking about how to prepare for job-hunting. You find this summary by a British author of a discussion held in a Japanese university.

### ***Get Experience, Get Ahead***

*10 June 2024*

*Andrew Smith*

*Manchester, UK*

These days, employers value life skills and real-world experience in addition to a university degree. Three students in their final year of university recently gave advice on the best ways to improve one's CV before starting job-hunting.

They all agreed that additional skills and experiences were important, and all felt that volunteer work and gaining more qualifications were great ideas. One student commented that volunteer work demonstrates both leadership and social responsibility. Another student said that it also develops soft skills such as communication and teamwork.

The three students had taken extra classes at the same university. Two had participated in special classes for international tour guides and one had received a teaching assistant's licence. One of the students had taken some online courses in computer programming. These helped him find a job at a major tech firm, where he will start working after graduation.

One of the students also talked about internships as she had spent three months in her final year working in a law office. Another agreed that this could give an advantage in some cases. However, one said this wasn't realistic for economically-challenged students because internships are often unpaid and

only a small number of companies offer jobs to interns after they complete their internships. He added that rather than an internship, having a part-time job gives a student teamwork and leadership skills, and also helps pay for tuition or social life at university.

In the end, all agreed that various strategies are available, and students should think carefully about their future goals and choose the way that works best for them.

問 1 Which of the following did all the students agree on? 

|   |
|---|
| 4 |
|---|

- ① A good university degree counts most in job-hunting.
- ② Most employers take an interest in bilingual people.
- ③ Skills and experience alongside a degree will appeal to employers.
- ④ Taking online courses to get qualifications is recommended.

問 2 Volunteer work will most likely 

|   |
|---|
| 5 |
|---|

.

- ① be necessary to graduate from university
- ② develop students' skills in working with others
- ③ give students a better position and salary in their future jobs
- ④ help to pay for college tuition

問 3 One student's opinion is that 

|   |
|---|
| 6 |
|---|

.

- ① doing an internship is not practical for some students
- ② he was able to find a job after finishing a programming course
- ③ many companies offer jobs to interns after graduation
- ④ studying online is cheaper than studying at school

問 4 Which of the following is mentioned in the article? 

|   |
|---|
| 7 |
|---|

- ① Detailed information about part-time jobs for university students
- ② Differences between paid work and volunteer work
- ③ Difficulty of taking extra qualifications at university
- ④ The importance of picking the right experiences for one's career

### 第3問 (配点 9)

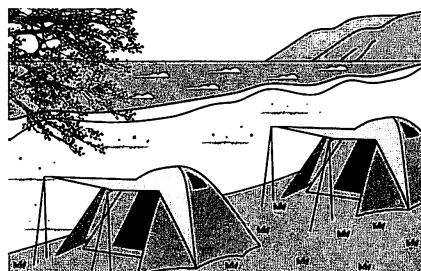

You are going to participate in a special summer activity. As preparation, you are reading an article in the school newspaper written by Tony, who took part in it last year.

#### Nature Appreciation Camp Adventure

This year, our class went to a nature appreciation camp in a national park by the beach. When we got off the bus, I felt the cool ocean breeze and heard the calls of birds high above. It was like stepping into a new world, and I couldn't wait to explore.

Our guide, Ms. Nash, was a wildlife expert. She led us along forest trails, explaining how the animals and plants all rely on each other. At one stop, we reached a quiet spot under an ancient tree with interesting roots. Ms. Nash explained that some trees in the forest were hundreds of years old.

Before the sun set, we put up tents near the beach. Ms. Nash taught us how to start a fire without a lighter, and we cooked dinner listening to the sounds of the night animals surrounding us. We learned about animals that come out only

at night. Ms. Nash explained that many of these animals have eyes that reflect light, so we might be able to see the eyes of a lizard, raccoon, or even an owl in the woods. Hearing that reminded me of my pets at home, my cat Luna and my bulldog, Leo. I told Ms. Nash about them, and she smiled telling me not to expect Leo's eyes to shine in the dark, because bulldogs don't have that special layer in their eyes. Luna's eyes would glow, though, she added.

The next morning, Ms. Nash said we should learn to feed ourselves in the wild and sent us to find coconuts. We came back with about ten. She taught

us how to get to the water inside, and we enjoyed the cool refreshing taste. Later, we broke them open and ate the white flesh inside.

Finally, we headed back, and my mother picked me up in front of the school. By the time we got home, it was dark. My two pets were waiting for me as the car pulled into the carport. I saw that Ms. Nash was right.

問 1 Tony’s article also included student comments (①~④) describing the events in the nature tour. Put the comments in the order in which the events happened.    8 → 9 → 10 → 11

|                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                          |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <div style="text-align: center; margin-bottom: 10px;">①</div> <div style="border: 1px solid black; padding: 10px; min-height: 100px;">I didn’t expect to see trees that have been around for centuries. I think it is great that they are protected now.</div> | <div style="text-align: center; margin-bottom: 10px;">②</div> <div style="border: 1px solid black; padding: 10px; min-height: 100px;">I knew that we’d stay overnight, but I didn’t expect to put up my own shelter.</div>                               |
| <div style="text-align: center; margin-bottom: 10px;">③</div> <div style="border: 1px solid black; padding: 10px; min-height: 100px;">It was scary to hear how many living creatures were all around us in the dark.</div>                                     | <div style="text-align: center; margin-bottom: 10px;">④</div> <div style="border: 1px solid black; padding: 10px; min-height: 100px;">The temperature difference at the coast was surprising to me. In town it is still warm even in the evenings.</div> |

問 2 Tony did **not** learn about 12 during the school's nature appreciation camp.

- ① an alternative way to create fire
- ② finding food in nature
- ③ the relationships between organisms
- ④ using a map to get around

問 3 When he arrived home, Tony most likely saw 13.

- ① a lizard climbing a wall
- ② his dog asleep in his bed
- ③ one set of shining eyes
- ④ two sets of shining eyes

第 4 問 (配点 12)

In English class you are writing an essay on a health issue to prepare for a presentation. This is your most recent draft. You are now working on revisions based on comments from your teacher.

| Treat Your Eyes Well                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Comments                                                                                                                                                                                                                                                                                                                                                        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>How many of your classmates wear glasses or contacts? With more screen time and less time spent outside, children have worse vision than they used to. Doctors do not all agree on what leads to bad vision.</p> <p><sup>(1)</sup> ^ There are some steps you can take for your eye health in general.</p> <p>First, when you look at something, try to hold it at least one foot away from your face. Whether you are looking at a book or a smartphone screen, your eyes have to work harder to focus on things that are very close. This makes them tired, and studies show a relationship between close work and bad vision.</p> <p>Second, <sup>(2)</sup> <u>pay attention to numbers</u>. "20-20-20" is easy to remember. This means take a 20-second break every 20 minutes and look 20 feet away when you have to look at something close for a long time. This helps reduce eye strain and may help protect your vision as well. It can also give you a short mental break.</p> <p>Lastly, wear sunglasses with ultraviolet (UV) protection. You probably use sunscreen to protect your skin from UV damage. <sup>(3)</sup> ^ UV damage does not cause bad vision, but it does lead to many diseases that are common in the elderly. If you want to have healthy eyes in fifty years' time, you should start protecting them now.</p> <p>As we have seen, there are some easy things you can do to take care of your eyes. <sup>(4)</sup> <u>Rest your eyes when you read</u>, take a break to look into the distance, and wear sunglasses when you go outside. Having healthy habits will help keep your eyes happy.</p> | <p><i>(1) Insert a connecting expression here.</i></p> <p><i>(2) This topic sentence doesn't really match this paragraph. Rewrite it.</i></p> <p><i>(3) You are missing something here. Add more information between the two sentences to connect them.</i></p> <p><i>(4) The underlined phrase doesn't summarize your essay content enough. Change it.</i></p> |
| <p><b>Overall Comments:</b></p> <p><i>This draft is much better. There's just a little more to improve before the presentation. (Do you wear sunglasses? I'm going to go buy a pair! 😊)</i></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                 |

問 1 Based on comment (1), which is the best expression to add? 14

- ① Indeed
- ② Moreover
- ③ Nevertheless
- ④ Thus

問 2 Based on comment (2), which is the most appropriate way to rewrite the topic sentence? 15

- ① find something 20 feet away
- ② rest for 60 seconds every half hour
- ③ take an “eye break”
- ④ use a timer when you do close work

問 3 Based on comment (3), which is the best sentence to add? 16

- ① For this reason, your eyes need protection from UV rays.
- ② In the same way, you should use sunglasses to protect your eyes.
- ③ On the other hand, sunglasses are also a good idea.
- ④ Sunscreen is becoming better for your skin because of recent improvements.

問 4 Based on comment (4), which is the best replacement? 17

- ① Don't use your smartphone when you are tired
- ② Keep some distance between your eyes and hands
- ③ Look at things which are far away
- ④ Spend more time working outdoors

## 第5問 (配点 16)

You are a student working as a teacher's assistant in a science class at your college. You are making a handout for a meeting with the professor to plan recommended activities in a research trip, based on the following article and the questionnaire.

### **No Wrong Way: The VARK Model**

Lisa Alexander, educational psychologist

Understanding the different ways people learn is important for teachers, parents, and even business managers. Everyone learns differently, which means that a method that is helpful for one person may not be suitable for another. The VARK model helps us to understand these different learning styles. The model divides them into four groups: Visual, Auditory, Reading/Writing, and Kinesthetic. Awareness of your own learning style as well as those of others can greatly improve the quality of learning.

First, visual learners do well when information is shared using images, such as pictograms, diagrams, and charts. For example, they may be better able to recall information from textbooks supported with maps and graphs than ones filled mostly with text.

In contrast, auditory learners prefer to learn through listening. They respond well to information delivered by lectures or audio recordings. In addition, auditory learners benefit from talking about certain concepts aloud such as in group discussions.

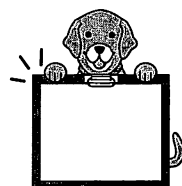

Next, reading/writing learners understand things best through written content. They prefer reading books, articles, and guidebooks and are generally good at taking notes. For them, writing is a necessary part of their learning process. Creating lists and summarizing information are effective strategies for enhancing their understanding and memory.

Finally, the word *kinesthetic* relates to physical touch and movement. Thus, *kinesthetic* learners prefer hands-on experiences. They understand concepts best through physical activities and real-world experiences. Engaging in experiments, building models of machines, or participating in role-play

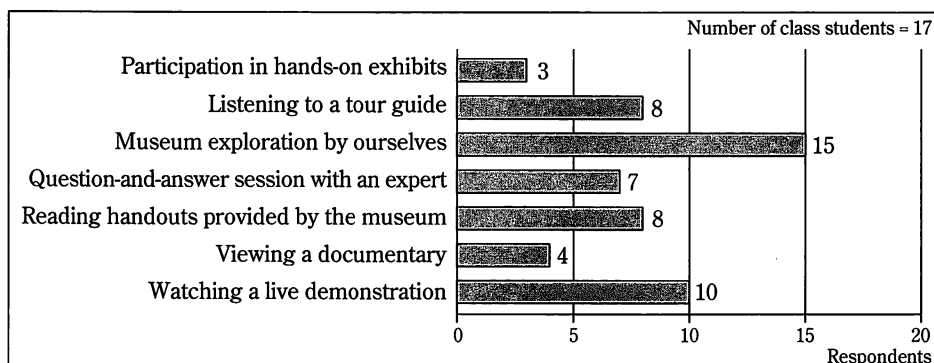

assists their learning. For *kinesthetic* learners, active physical interaction with real materials is the key to understanding.

Recognizing the VARK model can lead to improved study habits and educational experiences. Teachers can use this model to develop lesson plans that meet the demands of diverse groups. By acknowledging that everyone learns differently, teachers can create a fair and effective classroom for all students.

## Results of Questionnaire

**Q1: Choose all items that match your activities on past research trips to the science museum.**

**Q2: What do you think about your past research trip experiences?**

Main Comments:

Student 1 (S1): I went on a trip where the tour guide talked the whole time.

It was quite boring. I would rather participate in a workshop led by an expert!

S2: I'd like to see things we learned about in class. It's important to look at them in person.

S3: Although I think it would be fun to take part in a demonstration, I'm a bit nervous in front of people. Watching an informational movie is probably better for me.

S4: I think a guided tour would be great! The tour guides always provide extra information that you can't get by reading.

S5: I like it when I can touch things at the museum. Touching and moving the different parts with my hands makes it easier for me to understand how they work.

S6: On my last research trip, we looked at things and took notes by ourselves. It was not much fun, so I'd really like to stay with a group this time.

Your discussion handout:

### Research Trip Notes

#### ■ VARK Model and how to apply it

- VARK = Visual, Auditory, Reading/Writing, Kinesthetic
- What it is: 18

#### ■ Research Trip Suggestions Based on the VARK Model and Questionnaire Results

- Visual:  
Watch film or look at drawings
- Auditory:  
Attend an expert's lecture or 19
- Reading/Writing:  
Review a textbook and take notes
- Kinesthetic:  
20
  - A. Act in a role-play with a partner
  - B. Ask a museum guide questions
  - C. Create a model of machinery
  - D. Handle research tools
  - E. Participate in an experiment

#### ■ Other important points:

- Most students have 21 on research trips. However, 22 said this was not very enjoyable, so we should consider alternatives.
- The graph shows that few students have experienced exhibits where they could handle the materials, but 23 mentions that this is helpful for learning, so we might include it.
- It is difficult to find activities that fit everyone's learning style, so we should consider a variety of experiences on the trip.

問 1 Choose the best option for 

|    |
|----|
| 18 |
|----|

.

- ① A guide for parents to teach their children proper behavior
- ② A strategy for business managers to train their employees
- ③ A way to understand how individuals learn best
- ④ An approach to sharing key information with co-workers

問 2 Choose the best option for 

|    |
|----|
| 19 |
|----|

.

- ① discuss materials with classmates
- ② prepare a report on a topic
- ③ review maps and diagrams
- ④ touch exhibit materials

問 3 You are checking your handout. You notice an error concerning Kinesthetic. Which of the following should you remove? 

|    |
|----|
| 20 |
|----|

- ① A
- ② B
- ③ C
- ④ D
- ⑤ E

問 4 Choose the best options for 21 and 22.

21

- ① followed a tour guide
- ② observed an online demonstration
- ③ read informational pamphlets
- ④ walked around the location by themselves
- ⑤ watched a documentary film

22

- ① S1
- ② S2
- ③ S3
- ④ S4
- ⑤ S5
- ⑥ S6

問 5 Choose the best option for 23.

- ① S1
- ② S2
- ③ S3
- ④ S4
- ⑤ S5
- ⑥ S6

## 第6問 (配点 15)

In your English class, you have been assigned to read a personal essay written by a graduate of your university. You will give a presentation about it using notes.

### A Marathon Reunion

Maria Lawrence

I stood at the starting line, surrounded by a sea of runners stretching and chatting nervously. I took a deep breath and tightened my shoelaces. Today's marathon was special — I was running for an old friend I hadn't seen in five years. In my pocket, I carried a flyer for the event with a handwritten note that read,

"We'll meet again at the finish line."

I hoped that this was from my old friend Jenny. I was excited to find out.

Jenny and I met on the first day of university and bonded over our shared passion for running. From then on, we trained together, pushing each other to be better. Running was a bond that kept us close. However, things changed just after graduation, during our final marathon together. Every summer, the city where we went to university organized a Marathon. Halfway through, Jenny fell in front of my eyes and injured her knee. Some people around us helped me take her to a nearby medical tent. Before being taken to the hospital, Jenny told me to finish the race without her and said, "Let's meet again at the finish line."

I crossed the finish line that day, but Jenny never did. At the hospital, Jenny found out her injury was serious, and she might not be able to run anymore. I tried to visit her, but Jenny refused to take any visitors or calls. I

sent her a small gift and a card with the message, “We’ll meet again at the finish line.” Soon afterwards I moved back to my hometown and started working there. After four years of great memories together, suddenly there was nothing.

I checked my mailbox as usual, but that morning, I found something special. There was a flyer for the same marathon Jenny and I had run together five years ago. On the flyer was a handwritten message, “Let’s meet again at the finish line.” “Could this be from Jenny?” I wondered. My heart raced and I took a deep breath. After five years, I might finally be able to speak to my good friend. I had so many questions to ask her.

Since graduating, I’ve run at least one Marathon every year alone, but I never went back to the one near our university. It had too many memories. Two days before the race, I visited our old training track. As I sat on the bench where Jenny and I had enjoyed many conversations, I noticed something strange. It looked like my name. Then I saw a message, “Maria and Jenny — always cross the finish line together!” I didn’t remember this being there before. Suddenly, I felt a new hope and excitement for the race.

As the starting gun fired, I pushed forward, my feet hitting the road in rhythm with my racing heartbeat. I tried to focus, but memories of the past wouldn’t leave me alone. Back in university, Jenny had always been faster. She was the one who set our running goals, the one who encouraged me to train harder. When I was close to giving up, Jenny would find a way to make me laugh and keep me going. We were more than just friends — we were teammates who believed in each other.

The cheering crowd pulled me back to the present. I was nearing the halfway point of the marathon — the same point where Jenny had been injured five years ago. My legs felt heavy, but I kept pushing forward, driven by the hope of finding my old friend waiting at the finish line. I didn’t know if Jenny

would really be there, but I couldn't give up now.

Nearing the final stretch of the marathon, my muscles ached, and every breath was a struggle, but I kept running. This marathon felt longer than any I had run in the past, but the memory of Jenny's smile and the note in my pocket kept me going. I wondered what I would say if Jenny really was at the finish line. Should I apologize? Should I thank her for everything? These confusing thoughts made my steps heavier.

As the finish line came into view, I felt another rush of emotions. The crowd was cheering loudly, but I couldn't hear their voices over the sound of my own heartbeat. I crossed the line, breathing heavily, and looked around, searching for a familiar face.

There, among the crowd, was Jenny. Her smile was as bright as ever. For a moment, I couldn't move. Jenny approached, remarking that I had really kept her waiting. I laughed, wiping away a tear. Then, Jenny pulled out the card I had sent her while she was in hospital. We hugged and the last five years disappeared.

That evening, we went to dinner to catch up. Jenny told me how much she regretted not responding after the accident, and how eagerly she had awaited this reunion. Now, I began to understand how hard it was for her. Jenny told me that after the accident, she visited our old training ground every year and thought about our time together remembering my last message written on the card. Then earlier this year, she was sitting on our favorite bench reading the university's newsletter. She saw an article about the local marathon, and it had pictures from the last ten years. There, in one of the photos, was me and Jenny crossing the finish line. It was the first time we ran a marathon together. Jenny took this as a sign. That is when she wrote a message on the bench and the flyer.

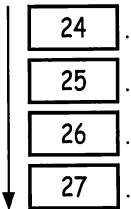

It has been two years since that wonderful reunion. Jenny and I visit each other often. We talk or video chat nearly every day. The doctor said Jenny could start training again. And that brings us to now. Jenny and I are standing at the starting line of a short 5km charity run. After all this time, Jenny and I discovered an important lesson. We shouldn't worry too much about the past. Every day is a new starting line.

Your notes:

## A Marathon Reunion

### Story Outline

Jenny has an accident and can't run anymore.

Maria crosses the finish line and meets Jenny.

### About Maria and Jenny

- Known each other approximately 28 .

### Interesting points

- Maria ran many marathons, but avoided the one held near the university.  
This shows that 29 .
- Jenny kept Maria's card for five years.  
This shows that 30 .
- "This marathon felt longer than any I had run in the past."  
This shows that 31 .

### What We Can Learn from This Story

- An important thing that both of them found in the end:  
32 .

問 1 Choose **four** out of the five options (①~⑤) and rearrange them in the order they happened. 24 → 25 → 26 → 27

- ① Jenny and Maria finish a race together
- ② Jenny is inspired by a photo in a newsletter article
- ③ Maria finds a message written at their old training spot
- ④ Maria receives a flyer of the marathon with a mysterious message
- ⑤ Maria sends Jenny a card with a message

問 2 Choose the best option for 28 .

- ① 7 years
- ② 9 years
- ③ 11 years
- ④ 13 years

問 3 Choose the best options for 29 and 30 .

- ① she couldn't face Jenny's feelings
- ② she didn't like it as much as other ones
- ③ she felt upset about their separation
- ④ she had made up her mind to forget their memories
- ⑤ she hoped to rebuild the bond they had before

問 4 Choose the best option for 

|    |
|----|
| 31 |
|----|

.

- ① Maria has never run a marathon alone
- ② Maria wanted to delay reaching the finish
- ③ Maria wasn't prepared for the race
- ④ The weight of Maria's emotions made it harder

問 5 Choose the best option for 

|    |
|----|
| 32 |
|----|

.

- ① It's more important to live in the present than worry about the past
- ② Small steps forward are better than waiting for perfect moments
- ③ True friendship can survive any challenge or misunderstandings
- ④ What is essential for our lives is usually hidden in the past

## 第7問 (配点 16)

You are preparing a presentation for your science club, using the following passage from a science website.

### **Artificial Coral Reefs: The New Rainforests of the Sea**

Coral reefs are an important part of the ocean. They are often called the rainforests of the sea because many types of marine animals live there. However, some coral reefs are starting to disappear because of the effects of climate change, like warmer water and more powerful typhoons. As a result, the number of marine animals has been decreasing. Furthermore, the loss of natural coral reefs can trigger changes in geographical features, and it can threaten the ecosystem of seashore areas. To address this problem, scientists are working on ways to make artificial coral reefs that are strong and safe for the environment.

Coral reefs are living things. They form in warm, clear water when small sea animals called corals attach to hard surfaces in the ocean. As they reproduce, they become a larger structure called a reef. In some places, people are building artificial coral reefs to protect marine life and beaches. To build them, objects are placed in the water for corals and other sea creatures to live on.

One benefit of artificial coral reefs is that they can help prevent erosion. Erosion happens when wind and water wear away soil and rock. For example, storms reduced the size of a beach in Australia by as much as 30 meters. People in this area wanted to build a seawall to protect the beach. However, seawalls can harm the environment. Instead, they built an artificial reef using steel cages filled with rocks and shells. They put the reef 100 meters from the shore to make the waves weaker before they reach the beach. Incredibly, in just five years, the beaches stopped eroding and even grew by about 40 meters in some places. Moreover, it consequently served as a place for marine creatures or sea weeds to inhabit like a real coral reef.

Another benefit of artificial coral reefs is that they can help increase the variety of fish in an area. Scientists studying one artificial reef in the Mediterranean Sea found more than 60 different types of fish living there. It

does not take long for fish to move in. In fact, it can take less than six months for the first animals to make an artificial reef their home.

Artificial coral reefs not only help the environment but can also be good for business. They support environmentally friendly travel, or ecotourism. For example, tourists can explore artificial coral reefs made from different materials. While crowds of tourists can harm natural coral reefs, artificial ones are less likely to be damaged. They also give tourists a new place to explore. This reduces the pressure on natural coral reefs, giving them time to recover and grow. Artificial coral reefs can also be built in places that are easier to reach. This helps attract more tourists.

While artificial coral reefs have benefits, there are some problems. Although they give fish more places to live, fish populations do not always grow. Since the public knows where these artificial reefs are, it is easy for fishers to find and catch many fish, which can hurt fish populations.

Another problem with artificial coral reefs is that only certain materials can be used to make them. The materials must be suitable for sea animals to attach to and strong enough to last in the ocean over time. Building them incorrectly can lead to problems. One famous example of a failed artificial reef is the Osborne Reef, built in the 1970s near Florida, in the United States. The local government approved the use of two million old tires. However, over time, the materials holding the tires together broke down and some of the tires began to move freely in the ocean. For this reason, sea animals could not attach themselves to the material for long, and as a result, these tires became waste in the ocean and ended up harming sea life. Therefore, using the right materials for artificial coral reefs is important. Plastic can be harmful to sea life, and wood does not last long enough. Safe and sustainable materials, such as ceramics, can be used; actually, there is a 3D-printed artificial coral reef in the Indian Ocean. Organic substances can also be useful. Potato starch from industrial waste is being used to create artificial coral reefs in some areas.

Although there is still much work to be done to stop the effects of climate change on our oceans, people are developing innovative solutions. The important thing to remember, however, is that these solutions must be carefully considered before being implemented.

Presentation slides:

### **Artificial Coral Reefs: The New Rainforests of the Sea**

1

### **Artificial Coral Reefs Can Be Made from...**

- waste material of plant origin
- metal cages
- **33**

2

### **Benefits**

Some benefits of artificial coral reefs include... **34**

- A: cleaner energy.
- B: more tourists.
- C: larger beaches.
- D: more homes for sea creatures.
- E: more variety of marine life.

3

### **Disadvantages**

Artificial coral reefs can...

- **35**
- **36**

4

### **One Role of Artificial Coral Reefs in Our Oceans**

**37**

5

### **Closing Remark**

**38**

6

問 1 What is the third acceptable material on Slide 2?

33

- ① ceramic structures
- ② paper boxes
- ③ pet bottles
- ④ wooden baskets

問 2 Which is an **error** you found on Slide 3?

34

- ① A
- ② B
- ③ C
- ④ D
- ⑤ E

問 3 Choose two options for Slide 4. (The order does not matter.)

35

36

- ① be hard for sea creatures to find.
- ② be unsafe for divers.
- ③ make ocean waves weaker.
- ④ pollute the ocean environment.
- ⑤ reduce the fish population.

問 4 What can be inferred about artificial coral reefs for Slide 5?

37

- ① Artificial coral reefs contribute to growth in fish populations as they provide ideal homes for fish.
- ② Artificial coral reefs help natural reefs to become healthier by being more attractive to tourists than natural ones are.
- ③ Artificial coral reefs keep seawater clean longer than natural ones because they are built with industrial materials.
- ④ Artificial coral reefs last longer than natural ones because they can adapt to changing water temperatures better.

問 5 Choose the most appropriate remark for Slide 6.

38

- ① Artificial coral reefs are expected to grow in popularity because they are economical.
- ② Even artificial materials can help to recover the marine ecosystem, although care is needed.
- ③ The next time you enjoy marine activities, try to choose activities that do not harm sea life.
- ④ We can count on artificial coral reefs to improve the tourist experience in certain areas.
- ⑤ We should note that many popular beaches have become smaller due to global warming.

(下書き用紙)

英語(リーディング)の試験問題は次に続く。

第 8 問 (配点 18)

You are working on an essay about whether the legal driving age in Japan should be lowered to 16. You will follow the steps below:

Step 1: Read and understand various viewpoints about the legal driving age.

Step 2: Take a position on lowering the legal driving age to 16.

Step 3: Create an outline for an essay using additional sources.

[Step 1] Read various sources

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>Author A (Traffic officer)</b></p> <p>Lowering the driving age to 16 needs to be thought about very carefully. Safety on the roads is the most important thing. Data in the United States, where 16-year-olds are allowed to drive, shows that young drivers are more likely to have an accident. In many cases, they don't have enough driving or life experience to make the best decisions. For example, they don't always concentrate on driving because they are often with their friends and talking, which is not safe. We need to be really careful before we let younger people drive. We have to think about whether teenagers are really ready for such a big responsibility.</p> |
| <p><b>Author B (High school student)</b></p> <p>If we could drive at 16, it would make us more independent. It would mean that we can handle big responsibilities earlier. It would show that adults trust us with important things. Being able to drive would help us get around by ourselves and help our families too. Besides, we can already ride a motorcycle. A car would be even more convenient. Some older people think we're not ready, but we are good with technology. Also, cars are much safer now. They even help us drive safely. I think we can learn to drive well and be safe.</p>                                                                                             |
| <p><b>Author C (Driving instructor)</b></p> <p>I teach teenagers to drive. I believe that age is less important than good teaching. If young people get good driving lessons, they can learn to drive safely. They need to understand how to be careful, see dangers, and always follow the road rules. If we let younger people drive, it's very important to give them these good lessons. Programs could also be introduced in high school, and families can help too. This will prepare them to drive safely. I think with the right education, teenagers could drive just as safely as adults.</p>                                                                                            |

**Author D (Parent)**

It would be useful if my 16-year-old son could drive. I wouldn't need to take him everywhere, and he could also drive me places. But I have worries. Driving isn't just about handling a car. Drivers need to think fast and make safe choices. Teenagers can be tempted to do risky things while driving, like using their smartphone to check their social media or watch videos. This makes me wonder if they really understand what it means to drive. Are they ready to keep their eyes on the road? This is a big concern for me.

**Author E (Japanese car salesperson)**

Many young people in the U.S. drive, and it's very helpful for their families. We should consider this for Japan too. It's true that young drivers can sometimes cause accidents. But we have good driving schools in Japan. We can teach young people to be more careful. Just because you are young, it doesn't mean you can't be safe. This could also be good for our economy. If more young people drive, we could sell more second-hand cars and young people might travel more. We should think seriously about this idea and its benefits to our society.

問 1 Both Authors C and E mention that 39.

- ① changing the rules could lead to other benefits for the country
- ② how safe you are as a driver is related not only to how old you are
- ③ Japan's effective education system helps children mature quickly
- ④ lowering the driving age to 16 would help families

問 2 Author B implies that 40.

- ① many parents trust their child's driving skills
- ② teenagers' technological skills make them ready for today's safer, more automated vehicles
- ③ the advanced car safety features in modern cars make young people more independent
- ④ young people find driving a car more challenging than riding a motorcycle

**[Step 2] Take a position**

**問 3** Now that you understand the various viewpoints, you have taken a position on lowering the legal driving age to 16 and have written it out as below. Choose the best options to complete [ 41 ] – [ 43 ]. (You must have all of [ 41 ] – [ 43 ] correct to get points.)

Your position: The legal driving age in Japan should not be lowered to 16.

- Authors [ 41 ] and [ 42 ] support your position.
- The main argument of the two authors: [ 43 ].

Options for [ 41 ] and [ 42 ] (The order does not matter) :

- ① A
- ② B
- ③ C
- ④ D
- ⑤ E

Options for [ 43 ] :

- ① Statistics provide the most important evidence against lowering the legal driving age
- ② The process of driving is too complicated for a 16-year-old to understand properly
- ③ Young people are more likely than adults to lose focus while driving a car
- ④ Young people need more life experience before they are able to take on responsibility

**[Step 3] Create an outline using Sources A and B**

Outline of your essay:

**Lowering the legal driving age to 16 in Japan is not a good idea**

**Introduction**

Although lowering the legal driving age would provide young people with more freedom, the driving age should not be changed.

**Body**

Reason 1: [From Step 2]

Reason 2: [Based on Source A] ( 44 )

Reason 3: [Based on evidence ( 45 ) from Source B]

**Conclusion**

The legal driving age in Japan should remain the same.

**Source A**

There are several reasons why Japan shouldn't lower the legal driving age. It is generally agreed that teenagers, especially those under 18, are still undergoing important brain development. This is most noticeable in areas such as risk assessment and decision-making. This would explain why data shows that young people, especially new drivers, are more likely to have a car accident. This has a serious impact on the cost of car insurance. Of course, young people have to pay more. If Japan lets younger people drive, insurance companies will have to rethink how they decide these costs. It is certain that insurance prices will go up. As a result of the higher price of insurance, families and young people could find it harder to afford a car. This

means that changing the law may only be acceptable to wealthy families. This also goes against the idea of letting younger people drive to give them more freedom. For these reasons, we need to be careful about this choice because it could make things harder for young people and their families and lead to more division in society.

**Source B**

A 2012 survey of over 1,700 teenagers carried out in the U.S. by New Liberty Mutual Insurance and SADD (Students Against Destructive Decisions) found that while it is true that young people may not be the best decision makers, it might not be all their fault. Many teenagers may just be copying their parents' bad driving behaviors.

| Text messages                                              | 59%                                              | 78%                                      |
| Drive without a seatbelt                                   | 47%                                              | 33%                                      |
| Drive under the influence of alcohol                       | 20%                                              | 15%                                      |
| Drive under the influence of marijuana                     | 7%                                               | 16%                                      |

問 4 Based on Source A, which of the following is the most appropriate for Reason 2? 44

- ① An increase in insurance costs for young drivers will make it harder for them to afford the expense of brain development.
- ② Lowering the driving age will result in higher accident rates because young drivers are less capable of driving safely.
- ③ The increase in insurance costs could have a bigger effect on families that are poorer, which is not fair for everyone.
- ④ Young people's lack of experience makes them more likely to have an accident and is an issue for insurance companies.

問 5 For Reason 3, you have decided to write, "The poor driving habits of adults need to be considered before we change the law." Based on Source B, which option best supports this statement? 45

- ① Close to 40% of parents drive under the influence of alcohol or marijuana, which is one of the most common bad habits among adults. This may be the result of alcohol or drug addiction.
- ② More than three-quarters of teens admit to texting while driving and more than 90% of them ignore speed limits. However, their poor driving habits generally follow a pattern similar to that of their parents.
- ③ Nine in ten teens talk on the phone while driving. Additionally, teens are 8% more likely to ignore speed limits than their parents. This may indicate that teens are more careless.
- ④ Parents behave worse than teens in more than half of the behaviors listed. They demonstrate bad habits, which creates a poor learning environment.
